Shell profits jump to £1.3bn

هكنامنالخصل

By Ray Dafter, Energy Editor

RISING OIL prices helped to boost the profits of the Royal Dutch/Shell Group to £1.3bn in the first half of this year, year, an increase of almost 240 per cent on the net income in the first six months of 197S.

Stock profits on oil passing through the Shell system accounted for about £400m of the £934m increase in net income. Unlike the majority of international oil corporations, most of the Shell companies follow the first in, first-out method of stock accounting which en-bances profits at times of rising oil prices.

The results were also influenced by currency fluctua-tions. Here Shell made a net gain of £124m in the first half as against a dencit of £191m in the first six months of last year.

Even so Shell reported that, setting aside the effects of stock profits and currency translation gains, its increase in net income the action. More than £21m of for the first half of 1979 over banking deposits had been 1978 was still about 23 per cent.

Increases

Much of this improvement came in the second quarter wheo the net income rose to £710m against £394m last year. Shell nointed out that in the second quarter market prices rose enabling the group to recover more rapidly the crnde oil price increases imposed hy producing countries.

" In the current environment of substantial increases in crude oil costs, this is essential if the group is to maintain its ability to replace inventories at the higher prices." Shell said. The approximate value of the group's oil stocks, even at their

present near-minimum opera-tional levels, was about £2.5bn. Other contributory factors hehind Shell's Improved profitability were increased North Sea oil production, greater sales of higher-value oil products and an Improvement in chemicals earnings.

The group, which reported

THE RATE of growth of the money supply slackened last month and the demand for hank credit eased from the buoyant levels of early summer.

PORTLIGAL Eso 35; SPAIN Pts 60; SWEDEN Kr 3.76; SWITZERLAND Fr 2.0; EIRE 20p

The Bank of England is, however, likely to want evidence of a sustained easing of monetary pressures hefore considering any reduction in interest rates.

Sterling M3, the broadly defined money supply, which includes cash and bank current aod seven-day deposit accounts. grew hy 0.8 per cent in the month to mid-July on a seasonally adjusted basis. This com-pares with a 1.2 per rise the previous mooth. The month to mid-July was

the the first of the new target period to mid-April, 1980, during which the permitted annual rate of increase is 7 to 11 per cent. One month's figures are insufficient for comparison, but over the last three months sterling M3 has increased by 3.4 per cent, which is still above the upper end of the target range.

The main change between the June and July figures is the slower growth of bank lending -up f381m compared with a rise of £1.03hn previously. This was the smallest monthly increase since last September, In addition, bank acceptances held outside the hanking system, another form of credit, increased by about £150m last

month, compared with £300m previously. These credits do not come within the official statistics and provide one way in which banks can avoid the corset restrictions on the growth of their activities. Such accentances have risen by over f1.1hn since summer 1978.

Covered

The authorities are taking a cautious tiew so far of this slowdown. Whereas bank lending in June ray have been artificially boosted by a high level of consumer spending the rise in val month. tax, the July figures have been official reserves rose substanunduly depressed. Commission 'did not overspend'

By Giles Merritt in Brussels

THE EUROPEAN COM-MISSION yesterday reacted sharply to disclosures of a probe into its expense account spending by demanding that the controversial report be published in full at the earliest opportunity.

It denied strongly that the sum allocated for representa-tional allowances in 1978 had been overspent by 23 per cent.

In a riposte that took Euro pean Parliament officials in Luxembourg by surprise, the Commission called on the Enro-Assembly to make public the analysis of expenses incurred last year by the 13 Enropean Commissioners so that it can make

a detailed rebuttal of criticisms. It also urged that the numbers code adopted by the European Court Auditors when writing the report to protect individual Commissioners should be dropped from the published version

A statement authorised hy Mr. Roy Jenkins, president of the Commission, also made it plain that it intends to contest many of the eritical conclusions contained in the andit court's 50-page report. It rejects criticism of commissioners' use of air taxis, pointing out that for top officials these are " a normal means of transport, not a joy-

people and a great dcal of

travel. It also points ont that

in spite of reported over-spending, the 13 commis-sioners did not exceed the 1978 "global financial enve-

lope" voted by the European

original 1978 allocation for

the Commission as a whole,

collectively and individually.

The statement says that the

-	RIO ALGOM LIMITED, et al.,	:	
		Defendants.	

ORDER FOR IMPOUNDMENT OF CERTIFICATES EVIDENCING RIO ALGOM LIMITED'S OWNERSHIP OF SHARES OF ATLAS ALLOYS, INC. AND FOR PUBLICATION

The Court having heard and considered that portion of the motion of the plaintiff, Westinghouse Electric Corporation ("Westinghouse"), brought on by Order To Show Cause entered May 16. 1979, which is directed to defaulting defendant Rio Algom Limited and which seeks an order requiring the said defaulting defendant to deposit in the registry of the Court the certificates evidencing its ownership of the shares of Atlas Alloys, Inc. ("Atlas Alloys") and granting other equitable relief to ensure that those shares are not transferred, alienated or encumbered in violation of the Court's prior order herein of January 14, 1979; and

WHEREAS, defaulting defendant Rio Algom Limited has failed to appear in opposition to said motion: and

WHEREAS, this Court on January 24, 1979 enjoined the said Rio Algom Limited and other defaulting defendants from making, or causing or permitting others to make, certain transfers or withdrawals of United States assets and from "taking any other action whose " effect would be, directly or indirectly, to divest a defaulting defendant, in whole or in part, of ownership or control, directly or indirectly, of United States assets"; and WHEREAS, Westinghouse has submitted evidence tending to show that Rio Algom

Limited has violated the said injunction by making, or causing to be made, certain transfers or withdrawals of United States assets: and

WHEREAS, Westinghouse contends that defaulting defendant Rio Algom Limited may further violate the said order by seeking to transfer or encumber the shares which it owns in Atlas Alloys, an Ohio corporation: and

WHEREAS, the Court has entered judgment holding that defendant Rio Algom Limited is liable to Westinghouse as alleged in the complaint and has determined, based on evidence submitted, that there is a reasonable likelihood that the amount of damages will exceed the value of the shares of Atlas Alloys; that there is a risk of irreparable injury to Westinghouse if those shares are transferred which outweighs any harm to Rio Algorn Limited which may result if such transfers are restrained; and that grant of the instant relief is in the public interest;

NOW, THEREFORE, IT IS HEREBY ORDERED that:

(1) Defaulting defendant Rio Algom Limited shall deposit in the registry of the Court the certificates evidencing its ownership of the shares of Atlas Alloys, such certificates to remain in the registry of the Court until further order;

(2) Defendant Rio Algom Limited is enjoined until further order of the Court

from transferring, alienating or encumbering any of the shares of Atlas Alloys or causing or permitting the issuance of any new shares thereof; (3) Westinghouse may make such publication of this order and the Court's prior order of January 24, 1979 as it deems advisable to give notice thereof to all who might otherwise he induced to account a transferrence of the alternative of the shares of might otherwise be induced to accept a transfer of the shares affected thereby or of any interest in such shares in contravention of the orders of the Court.

Polish economy in the doldrums

Herr Schmidt relaxes aboard the sailing vessel Atalanta

on bis way to visit Poland.

OFFICIAL ADMISSION of Poland's economic deterioration published by the Chief Statistical Office for the first half of the year. came last weekend in figures

It came as no surprise to housewives finding it more and more difficult to buy what they want and to factory managers struggling to produce goods against a background of power cuts and materials shortages. But the figures are an embarrassment to the authori-ties who are in the middle of putting together a new five year plan for 1981-85. the outlines of which will be presented to a party congress scheduled for the first quarter of next year. If present trends continue this year will show little or no growth, an economic perform-

ance which will almost certainly raise questions both inside and outside the party during the pre-congress debates on whether radical changes are needed in present economic policies.

The figures show no growth in industrial production of retail goods in the first six months over the same period last year against a planned 7.7 per cent expansion while industrial pro-duction overall rose by only 0.6 per cent against a projected 4.9 per cent. The official account for the first six months puts much of the blame for the weak

economic performance on snow and freezing temperatures at the beginning of the year and then spring flooding followed by droughts. But even if this year's Another reason fur the low pro-expected poor harvest can be duction figure is the need to

Vienna meetings as evidence of Mr. Yassir Arafat the PLO leader. in Vienoa.

Mr. Young said publicly this In a sense, they may be right. Direct oegotiations hetween the U.S. and the PLO bave beeo week what maoy in the Carter Administratioo privately feel: that by ostracising the PLO, the U.S. cootributes nothing to Middle East peace, except the placatioo of Israel

part of the Lebanon controlled by the PLO. Boycotting the PLO. Mr. But indirect contacts have Young said was "not a sound United States as well as for the taken place, most recently, it policy, but I understand it." It United States." President Carter appears, through the West was formulated in 1975 (by Dr. may well have privately recent Canadian history, but signally failed to reconcile the contradictions within his party and the fabric of Canadiao soclety. In 1962 Mr. Diefeobaker was forced into a minority position and was defeated on a ting year. "Dief the Chief," as he was

in Mr. Carter's recent public comparison of the Palestinian self-determination movement with the American civil rights atruggle in the 1960s.

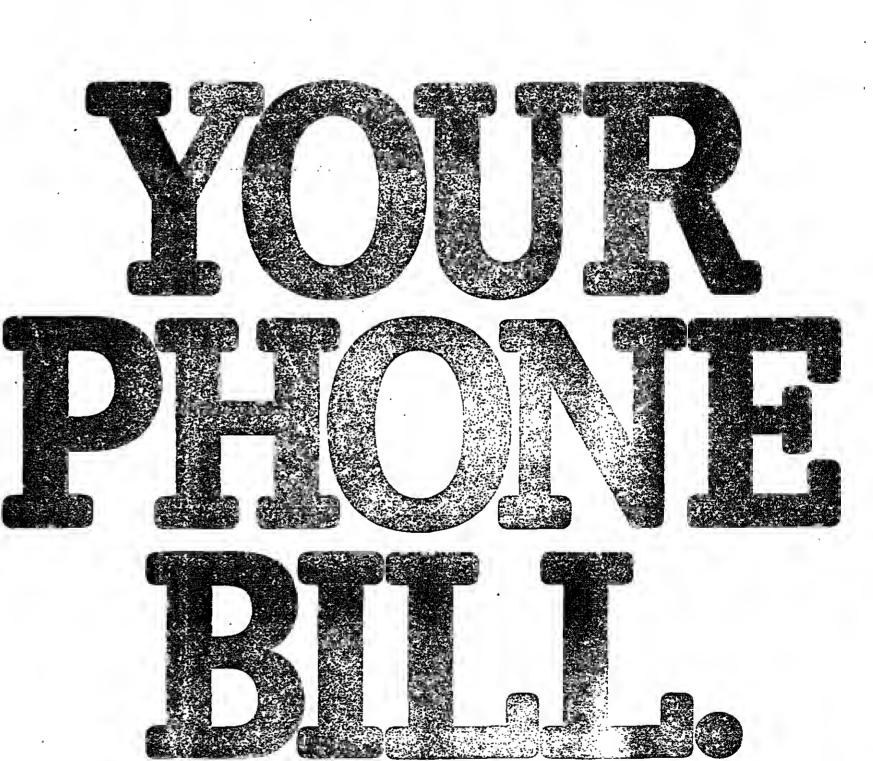

The Middle East issue was the catalysts of Mr. Young's demise, hut was only peripheral to his contribution to American policy at the UN and elsewbere. With Mr. Youog's departure, the Carter Administration loses an importaot part of what it perceived to he its moral con-tent, even if it does appoint aoother, and less free-wheel-ing, black to the UN post.

Previous U.S. Admioistrations, through such hluot envoys as Mr. Daniel Moynihan, had seen the UN, with its built-in Third World majority, loaded against U.S. interests. The Carter Administration, by appoioting Mr. Young, tried to work with that majority, particularly on issues like Rhodesia and Namibia.

Io terms befitting the expreacher, Mr. Young said frankly this week that coming from a race that had been oppressed io the past, he identified "with these the least of my brethree," the Third World.

But bis free-wheeling style, like a loose cannon on the deck of a rocking ship, eventually became more than the Carter Administratioo could weather.

Mr. Young once defined bis UN job as speaking "to the United States as well as for the

annual budget last February. This was part of several decisions taken to check infla-At the same time the number of yen hond issues by foreign countries and inatitutions tionary forces unleashed by the budget. Prices bave risen by more than 15 per cent since then, partly due to higher taxes but also because of other domestic and international factors like the cost of crude oil.

If the decision is carried out -it will depend on whether the Government wins a vote of confidence next Monday public investment would be slashed with effects on possibly all aectors of the economy.

The decision could also lead to a further postponement of the long-delayed sixth five year plan, the revised draft of which bas just been finalised by the Planning Commission.

SUDAN TRIES TO PUT ITS ECONOMY IN ORDER Nimairi faces his toughest test

BY JAMES BUXTON

The meeting discussed the of Vietnam in Kampuchea is thorny issue of Kampuchean not only lllegal but immoral representation which is and the Pol Pot Government is

PRESIDENT Jaafar Mobammed Nimairi of Sudan is no stranger to aevere polifical crises. In his 10-year rule be has faced three attempted conps and countless conspirecies, several in the past few months.

But the crisis he faces now, after several days of sporadic rioting up until last weekend and a strike on the railways, which was due to end yesterday. could be his hardest test yet.

The immediate cause of the crisis was the cutting of subsidies on several essential goods, leading to big price increases. This came against a background of increasing economic hardship at a time when Mr. Nimairi's political standing is probably weaker than it has been for several years.

The price rises, which took sugar up by a third and petrol hy two-thirds were partly a result of this year's oil price rise and partly an effort to cut government spending, as agreed with the International Monetary Fund under an economic reform programme.

especially torrid and when power cuts, the result of an overstretched electricity supply system, have made life miser-

The critical economic situa-tion was brought on by Sudan's bold development drive. bold development drivc, launched after the 1973/74 oil crisis to hring the country out of a vicious circle of low growth by developing agricul-"hreadhasket of the Middle at the insistence of the IMF East.

The shaky transport system and they refused to plant next been totally consummated: the Ansar has not been taken into became more and more clogged year's cotton crop-the main government, while the structure up, inflation soared, there was source of foreign exchange, of the SSU bas not been little foreign exchaoge left to Faced with a strike on the rail- modified as the Ansar wished.

initiative (an almost inevitable decision in view of Sudan's dependence on its defence agreement with Egypt). Cleverly, though, Mr. Nimalri

has managed to moderate bis support for Mr. Sedat and improve bis relations with Libya while retaining Saudi backing, all at the seme time. He also has much support in the West, notably from the U.S. as well as Britain, West Germany and France. Mr. Nimairi bas blamed the

latest riots on agitators from the outlawed but well organised Communist Party, but dis-content with the regime is certainly more widespread. As

result of the crisis be was widely expected to bring Mr. el Mahdi into bis Government to replace Vice-President Abul Gassem, dropped as a scapegoat last weekend. But either the offer to the Ansar leader waa offer to the Ansar reader was not made, or was not accepted, and Mr. Nimairi has instead appointed a tough, dynamic soldier, Gen. Abdul Magid Khalil, the Defeore Minister, to the Vice Presidency a move the Vice-Presideocy-a move which suggests he is determined to take a tough line with troublemakers and which should help consolidate support for the Government in the army, which has now pledged its loyalty to the regime. More changes in the political tructure have been promised, especially in the SSU, but it remains to be seen whether they will secure the whole-herated support of tha Ansas.

shifting his internal political In his speech to the people earlier this week President Nimairi called on them. in effect, to bear with him "a little alliances to suit circumstances. Much of his support is probably hased on the Sudan Socialist Union (SSU), the sole political party which is mildly left of longer." Many Sudanese people of different political colours feel they have borne with bim long enough, while with the world economy going into reces-sion the prospects for an economic recovery in Sudan in the near future cannot be good. A small oil find annoanced last month bas yet to be proved commercial. But it can be questioned whether, given the complexity of the country and the fact that so many of the most able Sudanesc are working But the reconciliation has not abroad, any other ruler of Sudan would be able to do any better.

THESE DAYS, A FUEL SAVING AERODYNAMIC SHAPE IS NOT JUST SMART, IT'S ESSENTIAL.

The design of the new Rovers has already helped to establish them as among the most distinctive and

distinguished of cars, regardless of price. But their shape does a lot more than catch the eye. It's the product of one of the most exhaustive research and testing programmes ever carried out in the car industry.

The result is a range of cars that apart from catching almost anything on the road, also achieves

spending at record £17.67bn

By Peter Riddell, Economics Corresp

CONSUMER SPENDING on durable household goods and cars and motorcycles rose to record levels in the early sum-

Central Statistical Office figures published yesterday show that the consumer boom between April and June-ahead of the big increase in value added tax was even larger than at first helieved.

The second preliminary esti-mate shows that the volume of consumer spending in this period was £17.67bn (at 1975) prices and seasonally adpusted). This is an upward revision of 64m from the first estimate ssued in mid-July.

Spending in the April-June period was 33 per cent higher than in the previous three months and 7.4 per cent more than in the same quarter of 1978, Expenditure over the first half of the year was 4.4 per cent higher than the average level in 1978.

The sharp rise in spending was the result of the increase in real incomes over the last year and of a bunching of purchases in June ahead of the VAT increase. Spending is expected to he less buoyant during the rest of the summer.

The Central Statistical Office commented yesterday that between the first and second that quarters all retail sales increased strongly, particularly clothing and footwear, furniture. and radio and electrical goods. Spending on alcoholic drinks, particularly spirits, also in-creased substantially. Spending oo durahle house-

hold goods rose by 15.1 per cent in real terms between the first and second quarters, and so far this year it is 11.1 per cent higher than the average level

for 1978. Expenditure on cars and motorcycles rose by 32.5 per cent between the first and

second quarters, as has already been reflected in the car registration figures.

me?

Is this the best way to reach overseas markets?

There are still some people who think all they have to do to achieve overseas sales is to get out into the market-place and hawk their wares like a fairground barker.

It may work for a few. But, for most, careful preparatory ground-work is essential, before success can be theirs.

Tell and then sell

Corporate advertising is one way of making your mark.

Intelligently used as a sales communication vehicle, effective corporate advertising not only educates and informs, it also helps to develop - and confirm - ideas and attitudes among widely differing groups of people. At home and overseas.

State airline market plans further 'set for fare increases £150bn'

BY MICHAEL DONNE, AEROSPACE CORRESPONDENT

with nther airlines is raising its international fares by about 12 per ceni from September 1, will have to consider further fares increases in the New Year, as a

a major new economy drive to

cut out waste in all departments. Mr. Roy Watts, chief executive, tells staff in the latest ssue of British Airways News that while the airline had planoed tu spend £300m on fuel this year, it now expects to spend £425m. The fare rises from September 1 will resiore some of the difference, but will still leave a substantial shortfall. And in the longer run, nf

course, these higher farcs, with the decreased level of conomic activity in the world because of oil price rises, will reduce pre-

dicted airline growth, if only temporarily," he adds. At the same time, the strengthening value of the pound in recent weeks has helped to reduce the value of the airlinc's overseas earnings. Because over 50 per cent of our airline revenue is earned ahroad, we get much less sterling after that money is con-verted to pouods," says Mr. Vatts. granted overflying rights by Traffic so far this year is China, that will substantially Watts

hooming," Mr. Watts says. "We cut the flying times on routes were planning on an increase in between passenger volume of 13 per cent, and we are actually doing 3 per also saving fuel. cent better lhan that. That is a very great achievement. Moreover, cargo traffic volume is on budget, in spile of many prob-lenis not of our making."

But, says Mr. Watts, in the traffic, we have a problem, as a mioutes' flying time per flight, result of sharply rising costs, and up to 1.5m gallons of fuel primarlly of fuel.

It will not change the predominantly leisure market. It to Peking from next April 1.

ERITISH AIRWAYS, which might slow down growth in tha short-term, and push 1986 predictions to 1987. "And it might mean our gettiog rid of some of our older,

fuel-inefficient aircraft sooner result of rising fuel prices. The airline is also introducing out materially affecting our fleet acquisition programme."

America. The group announced Two years later when Mr. Estes in June that it would spend over became president to run GM in \$2bn to expand in Europe and \$2bn to expand in Europe and partnership with Mr. Thomas tration and local policy. By all boost annual car production by Murphy, who became chairman accounts the Americans and

\$13bn 10 years-representing 20 to 35 having its local requirements each with the loss per cent of its total investment, met. This had resulted in a pro- 2,000 and 3,000 jobs.

Estes' influence on the internationalisation of GM should not be underestimated even though the group operates almost exclusively through committees. When he took over at the head of GMOO (GM Oversess Opera-tions Division) in 1970 he immediately decided that the international operations needed more help and that the U.S. could draw more on the expertise contained in the overseas companies.

In 1972 a strategy team was set up to see how the European business might be made more effective, particularly as Ford was already well down the path towards combining its operations there.

The question the team tackled was: How can GM become number one in Europe? Some fairly obvious conclusions quickly surfaced. The group needed more manufacturing capacity, but that capacity needed to be better placed geographically. GM also needed to change its marketing

And the going would get tougher. To start with the his-toric growth rate of the Euro-There is, of course, more than pean car markets of 4 to 5 per

French plan to abolish leasing restrictions

IT IS not just the British Government, that has been sttempting to sweep - sway restrictive property legislation -the French Government, too, is looking at measures to help property investors and developers.

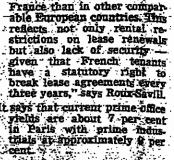

It has just accepted draft proposals to abolish rent restrictions on commercial lease renewals. These were muroduced several years ago in a bid to counter inflation. Under this legislation, commercial landlords are restricted to the amount of rent increase they can charge when a lease -a standard French lease nor-

mally runs nine years comes up for renewal. The mari-mum increase is determined sinnually by the Government. Chrrently, rents of renewed leases may only be 2.35 times the rent charged in the first year of the original lease.

Welcomed

Rour-Savill, the jointly owned ... Anglo-French agent, has wel-s comed the Government's acceptance of the draft pro posal which it says has caused many anomalies and calinot now be justified in a rela-tively stable property market.

ENERGY REVIEW: HARNESSING WASTE POWER

Mass heating versus freedom of choice

A STUDY of a new method of conserving energy, set up as a result of the last oil erisis in 1973, has recently reported-in line for the most recent one. That fact alone should ensire that it will be taken scriously by Government. Its findings may

become a feature of the lives of many of us before the end of the century. The method is called com-

hrief, it is a way of harnessing the "waste" heat produced in bulk electricity generation for the provision of space heat and hol water needs, by means of a pipe network from the power station to adjacent districts. It is one form-arguably the

most economic-of district heat-ing, where a number of dwellings share a common source of hot water for space heating and other purposes. A high level group to study

its feasibility was set up at the dise is hardly likely to attract end of 1974 under the chair. Ministers, especially of a Gov-munship of Dr. Walter Marshall, erament which has declared deputy chairman of the UK Alomic Energy Authority; it reported last month.

Its main recommendation was a bold one. It was that the Government should take the initiative in starting a "lead city" scheme-that is, test a project in a high-density conurhation which would serve as a prototype for more extensive development-aod that the scheme, or schemes, should be managed by local organisations. To manage the scheme or schemes, and to develop the system more widely, a National Heat Board should be set up (in effect, a new nationalised industry) charged with the fol-

Inwing responsibilities: • to produce an overall strategy for CHP and identifying lead city schemes; to set up local organisations to manage the schemes: 10 carry out detailed studies of citles and towns to determine their suitability for CHP: . to set aims and objectives for the district heating industry: to establish a financial frame-

Hardly, it might be thought. the most popular pitch to make to a Conservative Energy Department. Does it not risk being turned down flat, with no more than a polite nod for four-and-a-half years of labour? There are as yet no indications f how Ministers will react to the proposals, though they are heing briefed hy the various experts who sat on the CHP group which wrote the report. The kinds of arguments they

are hearing are these. First, as the report makes clear in its introduction. " there is no doubt that CHP can save energy, open scason on at least some whether applied to district heatexisting forms of state support. Yet, as the authors of the reing or 10 industry: the key question is whether it can do it port make clear, it is the lesser economically." This print is of two evils, the worse being made for the group by the compulsion. It is here, indeed, experience of industry, where that we leach what might he CHP schemes are commonplace, termed the philosophical core of the problem raised by CHP aud where some 70 per cent of the electricity generated by industry itself is associated with schemes cand one which is likely to recur in different forms heat recovery—that is, the in energy industries generally generator is linked to a central as resources become scarceri. In heating and hot water system. the case of CHP, the core ques-In a study conducted by the tion is how to maintain some group, it was estimated that such CHP lechniques at plan sort of freedom of choice when the apparent logic of the sys-tem demands that there be level saved two to three million tonnes of coal equivalent a year.

A district heating network using CHP only makes economic sense when there is a very high Rejected

take-up by householders within As may be expected, CHP an area of high density housing. does not represent a pure gain As the accompanying diagram in energy terms. At present, the two-thirds of the energy shows, the cost comes down by £30-£40 per dwelling per year as content of any power station fuel which cannot be converted between a housing density of 10 into electricity is rejected as dwellings per agre and 50 dwelllukewarm water: in order to ings per acre. The "natural" conclusion for planners to draw is therefore that all those lucky extract the rejected heat at a sufficiently high temperature to residents in a lead city should serve a district, there will inget CHP heating on the grounds evitably be some reduction of the electrical output of the plant, However, the report assures us that the energy heating systems have been utilisation of a power station a) 50 dwellings/acre (marginally of big city schemes would give installed, it is virtually com-pulsory. greater than that produced in an costs, then it is still competitive and the benign effect such a

energy conservation is to be -which may perhaps he known freedom of choice must be pursued only where it leads to in the years to come as the NHB, retained by the consumer, an overall savings in resources." as familiar as the NHS--and the though naturally that makes the Does this latest form of it do so?

Annual cost, per dwelling per year £400 MEDIUM TERM LARGECITY DEVELOPMENT **5% DISCOUNT RATE** £300-£200-_ Fuel costs tripling over 20 years Fuel costs doubling over 20 years £100-Fuel (constant cost House modifications -Primary net work -Meterine -Plant <Net work Transmission 15km 10 20 50 EXISTING GAS FIRED COMBINED "Housing density FUEL CENTRAL HEAT& POWER (dwellings per acre) MIX HEATING

هكنامنالأجل

There is no clear answer: or rather, "il depends." The accompanying diagram is im-portant here. The first conditional is; it depends on how you see fuel costs rising. The com-parisons in the diagram are between the existing fuel mix. a gas-fired central heating system. and CHP schemes for houses of 10.20 and 50 dwellings per acre. It shows that, if fuel costs stay constant, CHP costs are roughly the same as existing fuel mix costs at 10 dwellings/ acre, and better at 20 and 30: they are slightly higher than gas at 10 dwellings/acre. hut better again at 20 and 50. But if a doubling of real fuel costs are assumed—and this is the central Government guestimate-then the CHP economies are very large: at a pessimistic tripling, they are far too good to miss. The other assumption which is crucial here is the discount rate, or the rate at which the Treasury expects new projects to pay for themselves. At 5 per

cent, we get the results shown fuel mix and gas is only strong ever, it is hardly competitive at necessarily be tentative, but sidiscel freedom of choice: "we are in favour of CHP: but, as all except over the existing fuel indeed, counteracting a reces-these can be taken as reason-have thought it appropriate to the report also informs us, "It mix at very high densities. the forecasts tell us that CHP looks best on a low discount rate in large cities where the cost of fuel will double by AD 2000 Will the Government feel like proceeding on these assumptions?

11

BY JOHN LLOYD

It may take a cue from other European countries, many of which are further down the road than is the UK. Some 25 per cent of Danish heating is supplied by various district heating schemes, one third of that through CHP: in Sweden, the total is 20 per cent, of which nearly two thirds is CHP. In Germany, the total is S per cent, of which more than two thirds is CHP: France has a large scheme in Paris, and a Bill to promote CHP will be presenied to the Assembly later this year. In the UK, by contrast, there is a negligible amount there are tiny schemes in Noltinghum and Baltersea).

Entituslasis for the system claim enormous advantages for it, not merely in terms of here. At 10 per cent, and assum- energy and cost conservation. ing a real doubling of fuel costs, but in the boost which a large CHP competitivity with existing programme of public works almed at establishing a number with both. LOMBARD Searching for an alternative

BY PETER RIDDELL

simism about the economic outlook over the oext 18 months has produced an almost oriental fatalism about what the Government or aoyone else cao do about it. The common view-to use the almost inescapable medical metcohor-is that we have just got to swallow the barsh medicine or else our sickness could become incurable.

Yet there is a distinctioo between the narrow scope for manoeuvre on strategy and the possibly greater freedom on detailed policies. Sir Geoffrey Howe has argued that the UK has no real choice on strategy and that in anything but the shortest run the economic and social strains would he much greater with other policies. Indeed both Mr. Callaghan

and Mr. Healey sound thoroughly implausible and opportunist wheo criticising the "monetarist" policies of the present Government. After all, Mr. Healey did not hesitate to raise MLR whenever the monetary guidelines were threatened and be let the pound float freely, and upwards, both in 1977 and in early April this year.

Spending

has admitted since the election in tax on their profits. But this would have had to review existing public spending plans. But Sir Geoffrey's Budget mistake. 15 per cent in order to finance only affects expectations but also means that there has been a tightening in the effective monetory soucezc.

Other strategies do not really stand up. Any relaxation of fiscal or monetary policy would make it more difficult to reduce inflation and would probably have no more than a short-lived impact, if that, on output and employment. Similarly, any attempt to hold down the pound would jeopardise other policies since latervention on a large scale would probably produce a big, and destabilising, boost to the money anpply. While there may be no

the new chief architect and planning officer for the Corpora-tion of the City of London and takes over from Mr. Edwin Chandler who bas shaped the City for the last 18 years. He has a powerful job and a THE CURRENT widespread pes- credible alternative to the basic strategy, short of a slege economy and full-scale import controls, the UK is not inevit-ably heading for 6 repeat of 1974-75. As I discussed in this varied one. Apart from advising the Corporation on all new developments and drawing up column last Friday, the gloom should not be overdone-not plans for the future he looks only should consumera be much after the huildings and estates of the City of London. It is better protected than in the mid-1970s as a result of North up to him to see that Queen Sea oil hut industry may also Elizabeth I'a hunting lodge in Epping Forest is kept in good whether or not the City can bear the weight of more build-

take anticipatory action ahead of the squeeze. The overall financial deficit of Industry sbonld be less in real terns than in 1974, but parts of manufacturing industry could be badly hit.

Strategy

This prospect bas already led to talk about bankruptcles, applications for Government help and a U-turn. But the Government could take action without undermining its basic strategy. In particular, the Chancellor could consider lightening the tax burden on industry.

This suggestion might appear paradoxical in view of the decline in company taxes in real terms in the last decade, and successful companies Moreover Mr. Joel Barnett should perhaps he paying more

national insurance surcharge which now yields £3bn. Earlier there would have been important this year CBI economists differences of implementation, estimated that an extra 11 Labour would also have avoided points on the present 31 per Sir Geoffrey's Budget mistake, cent rate would reduce employthe only major Tory economic ment by 60,000 after two years, error to date, of raising VAT to would cut profits hy hetween £200m and £300m after a year a 3p cut in the basic rate of aod boost retail prices by 4 per income tax. The resulting cont after a year; unlike VAT increase in the inflation rate not the surcharge also hits exporters.

Pressures

A cut in the surcharge next year would ease the liquidity pressures of companies at a particularly difficult time and would reduce the cost of labour when unemployment might be rising sharply. Sir Geoffrey may anyway bave little leeway within his public sector borrowing limits in 1980-81 but a lower surcharge should have priority over a further reduction in the

THE ARTS

Cottesloe

Wings is virtually a docu-mentary. In 90 minutes, Arthur Koplt shows Emily Stilson hit by a stroke (a "left cerebral infarction") and treated for it by the staff nf a rehabilitation centre, ied by a patient thera-pist, Amy. There is no more to it than that. it that that. Some people there may be who will say that this isn't the kind of thing they want to see io the theatre; but if they don't see Wings at the Cottesloe they will not see Coo-stance Cummings in a perform-ance of ontstanding skill.

Emily is quietly reading when we first see her. A clock ticks beside her, peacefully counting the seconds uotil, inexplicably, there come little breaks to the sound that berald the disaster. The stroke itself, an experience impossible to represent factually, begins as a paodemonium of souod, a whirl of shutters, a meaningless flicker of voices and movement. When Emily is oext hefore us, she has lost contact with the world outside.

Mr. Kopit preseots simultancously the thoughts in Emily's mind and the events around her as they are and as she perceives them. External sounds seem distorted to her; when a doctor speaks, he speaks gibberish, though she herself believes that she is capable of coherent thought. Simple test questions put to her elicit totally irrelevant answers. Sometimes she imagines that she has spoken when she has said nothing. Perhaps, she thinks, I am sur-

rounded by deaf people, even mad people. For in her own mind she has created an explanation of what

is going on. She has had a crash in an aeroplane (she was once a pilot, and used to give exbibitions of wing-walking). Then she has been captured by. some enemy who is trying to estract vital information. Only for some reason she is on a farm.

The way in which she is gradually led by Amy (a sympathetic performance by John Maoden, who directs bere Gabrielle Lloyd) to understand, as he did in New York, depicts ing of what is going oo, and to the agitation of her mind with

Half Moon

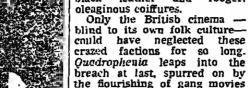

Wings by B. A. YOUNG-

Constance Cumming

coherently, is most interestingly shown by Mr. Kopit. How truthfully, of course I can't .say. Who koows what goes on inside a deranged brain? It is registers minute subtleties of comprehension in a performance that might so easily hecome a "cameo." She even seems able to add years to her looks by tiny manipulations of

eyes and mouth. It is a pity, to my mind, that

Leonard Bur

the ability to express herself

such a restless production when Miss Cummings could have done i, on her own. David Hersey's lighting plot gleams and glooms througbout to indicate chaoges of feeling as well as of place, all, at any rate, chillingly and Emily is led endlessly from convincing, and Miss Cummings one side of the stage to the one side of the stage to the other when she might have rested happily in the centre most of the time. My attention was never in need of any such extraneous boost. I wanted to conceptrate on Miss Cummlogs and Miss Lloyd, not to watch

doctors and nurses walking through a great labringh of switcelling screens or pushing chairs on and off the stage.

Remember Mods and Rockers? They were the rival youth-gaogs that io the infant years of the last decade used to turn Brighton into an annual Austerlitz and wage pitched battle on the streets and beaches. Bones were oroken, deck-chairs shredded and the local con-stabulary over-exercised. Mods wore simple clothes and shortsh. pre-puok hair: Rockers wore plack leather and looger.

crazed factions for so long. Quadrophenia leaps into the film history. breach at last, spurred on by the fiourishing of gang movies and '60s nostalgia across the Atlaotic, and produces one of the most exultantly offbeat British films I can remember. The story is strung like a necklace — or rather a bicycle chain — arouod the spiky. olatile head of a Mod called limmy. His adventures, first as resident clown and star attractioo of his Loodon gang, then as outcast and scapegoat (after he loses his spurs in Brighton by being arrested1 have a vivid. cooppy realism and a flailing wit uoique in recent British films. Phil Daniels's scaredfeatures and darting. emu puckish linmour hring the hero

to instant life. The Who's music stomps through the movie at frequent, heady intervals (the rock group also executive-produced the film) and Franc Roddam's direction pulla even fewer punches than

What could have heen an alloo-typical chunk of British proletarian realism, wateregged with liberal seriousness and Wednesday Play specialnleading, becomes here a dance, a celebration. If you looked on lods and Rockers hitherto as heings from another planet, you won't do so after seeing this film. Quadrophenia reaches out a grimy hand and hauls you Inside the characters' minds and culture. It's fairly squalid in these, but it's also funny and unnedictable and insidiously intoricating. The film doesn't ask you to approve the charac-ters' actions (Heaven forfend) -which include crashing and smeshing a genteel suburban party, breaking-and-entering Chemist shop to steal Purple

upoo-Avon. The former bas an obvious relationship to, and

the la

dramatic tragedy. The ingenuity of the Half Mooo knows no bouods. Rob Walker's Buchoer production is an overpowering futuristic extravaganza that almost edges the audience, out oo to the streets. As performed oo a large scaffolded 'set, we are led to believe that all that talk about human and bestlal nature has led to a society of Big Brother computerisation and moronic sex between inarticulate soldiers and compliant bu: disilhistoned whores. In the middle, Robio Hooper's muscular, shaveo-beaded and deeply affecting Woyzeck achieves release by stabbing Marie and steppiog, oaked, into a raised tank filled with water. The pond, I suppose. He drowns hunched like a foetus.

Elsewhere, though, poignancy is sacrificed in favour of coo-cept, with the Grandmother's speech about the lonely boy who discovered the moon to be a piece of rotting wood taken hy an andreid automaton and Marie's speeches of fear and conference of fear and confession replaced by weird outhursts about sexual organs and a well-endowed Adonis on Margate sands. The fairground interlude is very well done. Matthew Roberton leading the parade beceath an immense puppet and fairy lights.

Union Acceptances Limited is authorised to announce that Johnnies has decided to proceed with a private placing to raise R40,000,000 by way of the issue to certain South African financial Institutions of 40,000,000 variable rate redeemable cumulative preference shares of 10 cents each at an issue price of R1 per share. These shares will be subordinate to the preference shares already in issue.

The proceeds of the isse will increase Johnnies' financial flexibility and ability to take advantage of new business apportunities as they may arise.

A circular to members and notice of general meeting of ordinary shareholdars to be convened for the purpose of considering tha necessary resolutions will incorporate full details of the proposals and will be posted to members in due course.

Enforcing the tax laws

from the Rossminster company has implications far beyond the conduct of tax inspectors and the enforcement of the tax laws. The court's view, that the extensive powers of seizure granted to the Inland Revenue by the 1975 Finance Act must not be interpreted so broadly as to put the tax investigators' decisions heyond the control of the courts, could set an important precedent for other cases customs. police involving the competition and even autborities.

-14

Evasion

The Court's judgment will he welcomed by supporters of individual freedom, whatever their political complexion. Lord Denning's insistence that the Inland Revenue should bave heen prepared to specify to the Court the offences that it was investigating could even strengthen the hands of campaigners against the law of under which the police · Sus regularly arrest persons suspected of an intention to commit an offence, without needing to state the offence they suspect.

But the interests of the individual must be weighed un avainst those of society. Given the increase in tax evasion that this case. has manifestly occurred in recent years, should the Court have given more weight to the

interests of the Exchequer? Unfortunately the origins of the Black Economy are to be found not in any deficiency in the Inland Revenue's powers of cnforcement. The real causes of tex evasion are the far more intractable problems of penal tazation, coupled with high Indation and unemployment. These have made tax evasion highly profitable. More fundamentally, taxes on income practices, has been a thorn in which are sometimes confiscatory, at a time when inflation is eating away the value of repital, and do not command which is far more important than Inland Revenue investigations in ensuring compliance with the law.

the increase in criminal tax of society as a whole.

YESTERDAY'S decision hy the evasion, has been the growth Court of Appeal that the Inland of a whole industry, operating Revenue had acted unlawfully well within the law, devoted to in seizing a mass of documents the science of tax avoidance. Distorted

the

Widespread "tax planning." by which millions of individuals and companies have distorted all their financial activities simply in order to take advantage of tax concessions, appears to have been quite acceptable to successive governments and to the Inland Revenue. What the Inland Revenue bas found intolerable, however, has been the success of specialist tax avoidance companies, of which Rossminster has heen a leading example. These have devised

elahorate and secret schemes, taking advantage of tax loopholes in ways which Parliament certainly never envisaged. But this in no way justifies the Inland Revenue's aggressiveness in this case.

In view of this, the Court's assertion that the heavy-handedness of the Inland Revenue's action in this case was one of the reasona wby it has been forced to return all of Rossminster's documents is particularly welcome. The Court made clear that in cases The when officials do not ahuse their authority or act oppressively, they would bear a less heavy hurden of proof, in justifying

areas.

drawbacks. First, it opens np the need for unions to pay costly strike benefit-the AUEW, for example paya strike pay only for periods of three consecutive days strike action or more. Second, there would be considerable resistance from large sections of the industry's workforce-particularly in those companies where the national agreement is less of a factor in

earnings against losing virtually all income. The unions could not shoulder that successfully for very long. At the same time, the politics

of the AUEW. the dominant engineering Union have made the position of their negatiators awkward.

Negotiators had indicated to the Federation that they would accept a £70 craft rate and an unskilled rate of about £52. The union's policy making national committee, bowever, in a vote that was more reflective of the Left. Right split that a straightforward tactical decision tied the hands of negotiators to the

full £80 claim. There must be a possibility that a slight improvement on pay and conditions, with probably firmer proposals for the working party on conditions. would now be accepted by the national committee if such an offer were made.

Despite the lessons of 1972 there would also ba pressure from some union officials to push the dispute back into the regions if it proved protracted. with the prohability then of national talks being reconvened.

National level

The unions obviously hope that their action will lead directly to a much improved offer at national level. Mr. Duffy has made great mileage out of the union claim that more than 150 companies (only 10 of them Federation members) bave conceded the full demand. While this is undonbtedly very im-portant, especially on the issue of hours, many union officials cast doubts on whether a satisfactory settlement from their view point can be achieved hy what is up to now a very limited in the employers " crack " stand.

Mr. Duffy says one of the principal reasons why only a sure that the smaller and

have gone down this road is their

tions). Several Federation presi-

Bankers' field day

Anthony Frodsham, the Federation's director-general admits that non-Federation firms might be subjected to this at any time. He describes it as human nature " but says it does not go so far as amounting to an inwritten law. The regional associations have a good deal of autonomy in decid. ing how this sort of issue ought to be played.

Another important card met-Another important card that the Federation has in maintain-ing solidarity among its mem-bers is that of using its funds to help companies which ger ints difficulty as a result of the industrial action industrial account The problems that could arise from a company field are are undoubledly an element as Mr. Duffy says, in the backing that members are giving to the Federation stand. Equally im-portant, however, is the fact that probably a majority of members. In Mr. Fredshan's view, thought that the negotiat-ing committee of the Federation should have offered in more should have offered no more than 168 per week on the mini-mum rate. The plain truth for many of them, he says, is that they just cannot afford what the union is demanding

The engineering industry covers a huge artay of com panies and products, in which panies and products, in which some are obviously more suc-cessifi than others. But there is liftle doubt that for a com-hination of reasons, the industry as a whole is not faring very well. Much of the industry depends on exports for a good part of its turnover; where it is finding competition increasingly tough. The strength of sterling,

coupled with the growing pressure in third markets from overseas competitors with surplus capacity, threatens a difficult time ahead. At home, to be the U.S.-owned groups), members throughout the country peak has been passed, while the many medium-sized firms, and is obviously important in getting, share, held by important is some at least of the large backing for the Federation's, gineering products is creeping number of small companies in stand. 1.2.1.2

Parioral

t it the right

of Mr Young

The importance

nost important external probems it highlights is the subject which led directly to bis leaving office - the continuing negotia-tions over the Middle East. It emphasises, in particular, the problems of the relationship between the U.S. Israel's staunchest ally in the region, and the Palestine Liberation Organisation (PLO), Israel's mplacable foe. But it draws ttention, too, to the need for he participation of the PLO n negotiations if there is to be eventually a comprehensive ettlement acceptable to the najority of the Arah statea.

The Washington treaty beween Egypt and Israel, signed n March this year, was hased on the Camp David "frameork " agreements reached in he previous autumn. One of hese, dealing with hilateral elations, is being put into effect. The second, and more controversial, waa supposedly comprehensive, and lovelyed alks about the future selfgoverning status of Pelestinians n the occupied West Bank and Jaza Strip. After five assions liternately in Feynt and Israel and with no Palestinians preent), it is clear that nothing ubstantive has been achieved n these talks.

mpasse.

Egypt, with an eye to regainng general support from other trah states, has been trying to under way a process which vould ultimately lead to the foroation of a Palestinian state. By contrast, Israeli policy has been Jased partly on Mr. Begin's reluctance to yield parts of what ie regards as the historical land of Israel on the Weat Bank, and)artly hy concern about Israel's ecurity. He wants a form of elf-government which would ead. in effect. to the inhabitants of these areas cootrolling their ıwn lives, but not their terrinry. Not surprisingly a virtual mpasse has been reached.

At the same time, the Arahs lave in recent weeks heen conlucting a concerted campaign to present the Palestinians, and In particular the PLO, in a softer and internationally more acceptble light. Next Thursday, there esolution aimed at preserving be basics of the seminal UN esolution 242 (which essenrom occupied territories against

WHATEVER THE ramifications Arah recognition) and at perof the resignation of Mr. mitting the Palestinians to Andrew Young, the U.S. represestablish their own homeland. sentative at the UN, one of the The most recent Israeli fear has been that the U.S. has been manouevring to shift its political allegiance, towards PLO. In reaction, Israel, bas threatened to abandon the hilateral talks with Egypt over the West Bank and the Gaza Strip. The resignation of Mr. Young (and all it implies) has been greeted with relief by Israelis. But the Arahs bave taken it as a reffirmation by Washington that it wants to exclude the PLO from all negotiations. Such reaction increases the danger that the Middle East question will be linked ever closer to that of the levels of

oil production. Mirror images

In their own ways, these two reactions are mirror images of the same conclusion: that if there is to be peace in the Middle East. one which would preserve the Egypt-Israel peace treaty as a foundation and model for others, the PLO will have to be involved. At present, and unsurprisingly, this appears to be impossible. There has however been some detectable shift in Palestinian

thinking. From interviews given by Mr. Yasser Arafat, the PLO cbairman, it is clear that when he talks about a homeland he is implicitly accepting Israel's existence within the 1967

oundaries. But he has yet to he explicit. If the PLO were to come out more directly hy aaying that it recognised Israel'a right to exist, and if at least a ceasefire were to be pronounced the deadlock between Egypt, Israel and the U.S. over the future of the Palestinians might be resolved. Inevitably, the initial stages

of such a process would have to he hlurred-perbaps through some relaterpretation of resolution 342 to acknow wige that the Palestinians are not just "the refugee problem." This would require Israel to accept the PLO as a representative organisation. something which has been anathema hitherto. It would re-

quire of Mr. Arafat that he partially yields his main barattempts to keep the fissiparous PLO organisation together. It s to he a UN Security Council would not yield immediate relehate on a Knwaiti-sponsored sults. But it would open the

way to hroader-hased negotia-tiona on the heart of the Middle East problem: how Fraelis and ially harters Israeli withdrawal Palestinians can live together in reace.

Financial Times Friday August 17 1579 Robert Graham in Madrid reports on the Spanish Government's somewhat belated attempt to deal with an economy plagued by difficulties

THE SPANISH Government has ployed in addition to possessing a talent for self-inflicted injury. a series of deeply troubled seca talent for self-inflicted injury. a series of deeply troubled sec-Frequently this has happened tors like steel and abipbuilding over economic policy when the ill equipped to cope with a deep Government bas committed recession. Why then delay the itself to a timetable. No sooner economic programme until four is a timetable made than the months after the present Government proceeds with a Government took office? lack of urgency that exasperates

the second

 \mathcal{I}

even its strongest supporters. The ensuing delay not only squanders goodwill but lessens the impact of the measures when finally introduced. particularly good example of this behaviour has been the Government's new economic programme, finally announced this-week.

To bead off criticism that coming down and that unemploy-nnthing was being done to ment was not levelling off. revise projections that were By inclination Sr. Abril would looking increasingly out of date, have preferred some fine tuning, the Suarez Government under-but the message both from the took on Mar 10 to present employers federation (CEOE) took on May 10 to present before Parliament an economic programme within two months. By the end of July Parliament broke up and still there was no economic programme, or rather there were sufficient leaks to suggest one had been completed but no one knew when it would be announced. It was put about that the economic overlord, depnty premier Sr. Fernando Abril Martorel, was waiting for the right moment to achieve maximum impact-which incidentally had passed since in August more Spaniards are interested in holidays than in economic plans. Then this Tuesday, without aoy apology for the delay, the programme was released at a Press confer-ence that had been hurriedly organised the same day.

This poor sense of public relationa is particularly unfortunate. Not only does it undermine the sense of economic crisis which the Government is rightly generating. It also detracts from the impact of the programme itself which, apart from specific targets for the rest of 1979, is the first considered approach as m bow democratic Spain'a economy should evolve over the next few years.

In presenting the programme this week, Sr. Abril did not con-ceal the seriousness of Spain's economic position. "It is bad, very bad," he said, Of the OECD countries, Spain continues to sustain one of the highest levels lost. This year the gloomy of inflation and ooe of the picture of deep recession will

For a start, the Government was slow to realise that its initial projections for growth, wages and inflation were being overtakeo by events. Not until the end of April was it realised that the average wage settle ment was above the anticipated 12 per cent norm, that public sector credit bad expanded too rapidly, that inflation was not

employers federation (CEOE) and the trades unions was that the Government had to show the way and come up with a formal plan. As a result the Ministry of Economy was pressed into service to adapt a medium term schema on which it was work-ing. This led to inevitable fricjections on to a larger statement of economic intent, when new elements emerged, com-

pletely altering the picture. The OPEC price rises at the end of June cumulatively increased Spain's energy costs by 70 per cent in six months. Parallel with this, much more bearish forecasts of domestic growth began to filter in, also affected in part by downgrading of international growth estimates. Finally the Govern-

ing, the main source of economic activity this year. If spending continued to follow the trend of the first balf year the anticipated public sector deficit would be Pta 400bn (£2.8bn) double the late enough to take account of

all these changes. But given the sanctity of mid-year inflation adjustments August as a month of holidays to wages the energy increase and the torpor which surrounds the early days of September, valuable time has aiready been response.

Shaky start for Spain's economic programme

to grow at 2.6 per cent, half be a tight monetary policy the original estimate and Here the Government has com-almost one point below mitted itself to cutting back projections offered in April. public sector speeding, though This will be the lowest growth the measures anticipated will registered in Spain in over a still leave a deficit of Pta 100bn decade and is the culmination (S714m), more than originally of a progressive recession that planned. An across-the-board began to be felt in 1976. If cut of 2.6 per cent in all currect began to be felt in 1976. If cut of 2.6 per cent in all curreot agriculture fails to pick up in spending is being imposed on of short term measures and pro- growth could be even lower. In increases are being postpooed every department, some pay the industrial sphere the most and the vast social security the Government is boping for is the financing of some build-

ing up of new stocks. Demand for industrial products is at an all-time low and steel consumption is below level of five years ago. One significant indicator was a 49 per ceot drop truck sales in April.

The Government is now projecting an inflation rate of around 16 per cent for 1979. its original hope was to cut it ment received some alarming to 12 per cent. At least two statistics on public sector spend- per cent of this is attributed per cent of this is attributed to increased energy costs. The 16 per cent projection is almost certainly optimistic—the recent OECD report on Spain forecast up to 18 per cent. Much depends on the Government being able initial estimate. Perbaps it was to persuade Spaniards that they just as well that the final should absorb increased energy on public spending. The first is the municipalities, which since April have been run by freelyversion of the programme came costs without demanding compensation in the form of a increase in wages. Hence in the

element have been ignored. The trades unions for their part have yet to formulate a

large sums of money into many municipalities to keep them from from going bankrupt. The second burden is that of Statecootrolled companies in difficulties which has increased sharply as a result of the high cost of money and depressed domestic

ments, represented 8 per cent ing and mining in particular. both to cover current spending 1975. It now represents 12.5 per and as soft credit for restruc-cent. In three years public turing. In addition, the Governspending has increased five ment has been obliged to create times to over fibn. (50 per cent a special crisis fund to help of this now goes on pensions, investment and those areas another quarter to unemploy- most depressed, like Andalucia, where unemployment is as high as 16 per cent of the working population.

By cutting back public spend-ing, the Government not only hopes to ease inflationary pressures hut also to make more credit available to the private sector, which in turn will ease the cost of such credit, so

elected administrations. The stimulating investment, deht-ridden state of the municl-Most of the measures which pallties had been igoored by the Government should have Franco and, until the elections, taken bave now heen adopted; had been given scant attention though admittedly 18 months by Sr. Suarez. Therefore iste, span a new more belatedly the Government has realistic energy pricing policy:

percentage of funda with the Baok of Spain and the artificial appreciation of the peseta against the dollar has been halted: and serious efforts are being made to end the old protectionist mentality so that the country is in a position to cope with EEC entry.

The real problem now is that the Government wants (as spelled out in the economic programme) to create a liberal market economy, yet the private sector is in no shape to cope. Earlier this year, in the wake of the election success of Sr Suarez's Union de Centro Democratico (UCD) Party, the banking and husiness communities seemed confident about the country's future-a confidence which had been withdrawn after Franco's death. Yet the Government lost this moment and now once again the business cominimity is in a pessimistic mood. There is onliner proper trust of. nor confidence in, the emerging trades union movement. The Government is considered frequently unhelpful and too often

than an "optimistic forecast"

World oil

supplies

than

=s f()i

EOPLE

From Mr. W. Cooper

If we consider Professor Odeil's claim that annual economic growth could be maintained at 3 per cent per annum, with only a 1.5 per cent annual increase in oil consumption (a highly suspect relationship ratio), it would mean a cumulative consumption of 74.5bn tons of oil (MTO) between 1979 and 1999 inclusive. In other words, all present known WoCa oil reserves will have exhausted. been

It is not without interest that only 24 hours prior to Professor Odell's remarks Mr. Ulf Lantze, executive director of the Interthat world oil supplies could fall that world oil supplies could fall sbort of demand by as much as 4m barrels a day (MBD) by 1985, and this shortfall could reach 10m MBD by 1990, and 28m MBD by the year 2000.

Recent oil discoveries have been running at just over 10bn barrels a year. If we are to reach the end of the second quarter of the 21st Century (a period of 70 years from next rear) the amount of oil which has to be discovered to meet this level of consumption has to be of the order of five times as mach as present known reserves. This is on the 1.5 per growth rate in energy (and suggested in Professor ell's scenario.

According British to Petroleum the discovery of 18bn barrels of oil a year (BBY), or 2.4bn tons is an optimistic rate of discovery. In 1974 the United States Geological Survey pre-dicted that oil to be found on the Atlantic seaboard might approach half U.S. oil reserves, yet, to date there has not been a significant discovery there, even though oil companies have drilled numerous exploratory wells.

Thus, the reality of the WoCa situation is that on present known reserves we have about 25 years' oil supply left. We can summarise the prevailing situation in WoCa at the end of 1978 as follows:-

bn. barrels Cumulative production to end 1978

346 end 1978 Reserves at end 1978 ... 555 901

porate four-flow exhaust tur blnes from GEC, the design being a development from GEC's earlier six-flow exhaust turbine as supplied to Heysham and Grain (and Hartlepool and Hinkley Point B, both AGR stations, previous to that).

How come. therefore, the present silly nonsense? If CEGE chose GEC's four-flow design for Littlebrook, previously baving had six-flow turbines from both suppliers, why the change back? How also can the attitude of overseas customers be explained-GEC has been far, far more success ful in selling its four-flow design than NEI bas in selling its six-flow turbine-particularly when one overseas customer bas stated that in choosing the GEC four-flow design he was influenced by the commonality this would bave with CEGB ordered turbines.

Since large sums of tax-payers' money are at stake, are we not entitled to a full and detailed answer from the generating Boards ?

D. N. Odling. 21, Lennoz Gardens, SW1.

Car excise licence From Mr. T. Whittle

Sir .--- If the £50 car excise tax is transferred to petrol to give the same net yield, this must mean that owners of cars below average petrol usage will pay less and those above pay more. The opposition of the Royal Automobile Club aod the United Commercial Travellers Association (August 10) infers a "penalty" because their cars are larger and/or their mileage above average. Cars with above average petrol usage tend to be run for commercial profit (or presuge).

Those below must include a majority of private motorists who need a car to get to work, rural dwellers, working mothers, retired people and weekend drivers. It is unfair that the greater

burden of tax should fall on the large numbers of occasional users of smaller cars - perbaps **Orders** From Mr. D. Odling. Sir,—The recent announce-nent about the split of orders dispute. It would also be an between CFC and NEI for the split of the s incentive to conserve fuel. Com-

advanced gas-cooled reactor mercial lorries using diesel are power station orders makes of course a different matter. extraordinary reading. There is a strong case for Consider the following which abolition of the excise tax, with lists, going backwards in time, little or no increase on petrol. the orders placed for turbine Tax on petrol is much cheaper to the collect and evasion of the excise customer, the supplier and the tax would be stopped. Extra petrol tax might be alleviated CEGB NEI Coal (and belp to pay the cost of the computer) by retaining a registration fee on new cars Oil

R. Dutch Shell midway profit at record £1.3bn

THE underlying trend in earn-ings of the Royal Dutch/Shell Group of Companies has improved in the first half of 1979. Net income in the second quarter was £710m to give a total of £1.33hn for the 6rst six months compared with £394m all of which occurred in the second quarter last year.

The second quarter result have heen very substantially affected by the FIFO method of inventory valuation and hy curtranslation gains, the directors report.

Currency translation gains in the second quarler were £57m (£102m) and £124m for the first half against currency losses of £191m last year.

The directors explain that the FIFO method is higher al a time of rising crude oil acquisition costs. In the second quarter net iocome was increased by some 280m and by some £400m in the balf-year compared with follow-ing a LIFO method. During the first half, the corresponding effects on act

income were negative hy about 560m. Eliminating the FIFO effect and currency translation gains, the increase in net income for the half-year is about 23 per cent.

Net income excludes a net reduction in deferred tax of accounting policies relating to capital. capitalisatioo of leases and

exploration costs. Sales proceeds, less sales taxes. excise duties and similar levies werc £7.1hn (£6.04hn) in the second quarter giving £13.77bn against £11.8hn at halfway. First half net income per 25p share and Fl 20 Royal Dutch

HIGHLIGHTS

Royal Dutch Shell announced second-quarter net profits of £710m yesterday, showing a superficial rise of 80 per cent, hut there is a very large stock profit and currency gain in the figures. The Government broker was supplying the new tap stock yesterday morning and Lex investigates the sharp downturn in bank lending revealed by figures published later in the day. Lex also looks at the half-time results from Royal Insurance, where a hig swing to underwriling profits came through in the second quarter but for the full year as a whole profits are likely to he down. Elsewhere the good half-time pronts are likely to nc down. Elsewhere the good half-time figures from Ultramar are commented upon and Transport Development appears to have struggled through the transport strike without loo much grief. Other comments are made on Bernard Wardle, N. Corah, Fertleman, Woodhouse and Rixson, and Charles Clifford.

imposed by oil producing counwhich was offset hy higher unit realisations.

Dividend and Capitalisation issue

Your Board recommends a final dividend of 1.45p making 2.25p for the year as compared with 2.0p for the previous year.

The Board also recommends a capitalisation issue of one for two to Ordinary and B. Ordinary shareholders.

It is expected that the amount available for dividend in respect of the current year will again increase. The Board is therefore recommending an interim dividend on the Ordinary share capital as increased by the capitalisation issue of 0.60p (as compared with the equivalent of 0.533p for 1979).

Change of Name

It is proposed to change the name of the company to Murray Northern Investment Trust Limited in line with the policy to identify individual companies more closely with their management group.

Copies of the report may be obtained from the Secretary, The Second Great Northern Investment Trust Limited, 163 Hope Street, Glasgow G2 2UH. An Investment Trust managed by Murray Johnstone Limited.

Review of Group financial results and operations

Record profits

Our financial results for the first half of 1979 were excellent and a record for the Group. Operating profit before taxation amounted to £23,799,000 compared with £18,140,000 for the first half of 1978. After deducting current and deferred taxation, the operating profit for the six month period came to £13,881,000 compared with £6,366,000 for the first half of last year. Non-cash foreign exchange gains for the first six months of 1979 totalled £2,149,000 giving us net earnings attributable to Ordinary Shareholders of £15,330,000. Cash flow from operations in the first half amounted to £22,792,000 which . is the highest in Ultramar's history. These results have been achieved even though most of the Group's earnings are in U.S. and Canadian dollars and, when converted to sterling, the results are adversely affected because of the weakness of the dollars.

Our producing operations in Indonesia, Western Canada and the North Sea were profitable with Indonesian oil and gas production showing up particularly well as a result of better realizations. The demand for LNG is increasing as a result of the world energy shortage. From the Bontang LNG Plant in Indonesia it is expected that at least four cargoes will be sold during the second half of 1979 above the 51 cargoes projected for the year. In the Badak and Nilam fields the four rig drilling programme continues to be very successful and there are now . more than adequate gas reserves to support the expansion of the LNG Plant by adding two trains and thereby doubling its capacity. Construction of the production facilities for the Maureen field in the U.K. North Sea is proceeding well and development drilling has commenced. We are continuing to explore for new oil and gas reserves in various parts of the world.

Our refining and marketing operations in California and Eastern Canada were profitable. California had excellent results for the half year but Canada still does not give an adequate return on our investment. Marketing operations in Eastern Canada were held back because of shortages of petroleum products. We had to run our Quebec and Newfoundland refineries below capacities because of dislocations in Middle East crude supply and inability to get an adequate volume of Western Canadian crude oil. However, even at full capacity, our refineries are unable to meet the total sales volume of our Eastern Canadian marketing complex. As in past years, we expected to buy a sizeable portion of our needs of petroleum products, but the supply has now been cut back. In other marketing areas, we did well with the exception of the U.K. where we had a loss. However, we expect to do much better in the U.K. for the second half because of availability to us of crude oil from the North Sea which we are having processed into products to supply our market.

We expect the Group to continue to show good financial results in the second half of 1979.

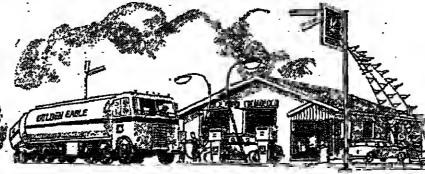

The Board has declared an interim dividend of 5p per share on the Ordinary Shares which, with the addition of the tax credit, is equivalent to 7.1429p per share. The dividend will be paid on 9th November 1979 to

shareholders on the register on 9th October 1979.

• comment:

Four years ago, Woodhouse and Rixson was making profits in excess of fim pre-tat. There is no reason to suppose that the group is capable of making any thing like that figure in the current year, even though the effects of the disastrons foray into the Belgian flange market are now safely out of the way. The shares climbed 14p yester-The snares crimed 149 yester-day but, at 24p, the price has long recognised that demand is running at levels, significantly lower than the bonk years and is likely to remain flat in the foreseeable future. The winters foreseeable future. The winter a industrial turbulence reduced profits by £75.000 at the interim-stage which, when added back still only indicates fractional growth Margin pressure appears to be increasing, the terms of international trade have worsened and the engineering industry faces strike action which looks to be deepening. On that hasis, it would be difficult to anticipate very much better than same again second half profits where the p/c, after the same low rate of tar, would be around 5. Of far, greater importance is a yield of 14.5 per cent on the 1978 dividend which

and redundancy costs of £70,000 First half earnings per share are stated as 2.3p against 1.9p. cent on the 1978 dividend which and the interim dividend is lifted explains. the presence of from 1.15903p to 1.21092p. The significant income pust holdings

Excluding Shell Oil Company and Shell Canada, sales volumes of oil products were lower, by 2% than in the second quarter 1978. However, oil supplies available to the Group have? not been sufficient to make the necessary replacement of the inventories that were drawn down in the first quarter of this year?

Sales volumes of natural gas as compared with the second quarter 1978 declined by 4%, s in the Netherlands and West Germany, the effect

Royal Dutch/Shell Group of Companies Results for First Half 1979

> An interim report by Royal Dutch Petroleum Company and The "Shelf" Transport and Trading Company, Limited on the results of the Royal Dutch/Shell Group of Companies, in which their interests are 60% and 40% respectively.

In the second quarter 1979 market prices have risen, anabling Group companies to recover more rapidly the crude oil price Increases Imposed by oil producing countries. In the current environmant of substantial increases in crude oil costs, this is essential if tha Group is to maiotain its ebility to replace Inventories at the higher prices. The approximate value of Group oil inventories, currently at neer minimum operational levals, amounts to £2,500 million.

Compared with the majority of international oil companies who follow tha last-in first-out (LIFO) mathod of inventory accounting, the net income of the Group, largely accounted for on tha FIFO mathod, is highar at a tima of rising crude oil ecquisition costs. This results from these additional costs being carried forward in inventories into the succeeding quarte instead of being charged against the current quarter's net Income. The higher crude oil costs which arose in the first and second guarters of 1979 ara a measure of the increasa in the amount required to finance the higher-cost inventories. In the second guarter the Group net income was increased by soma £280 million and in the first half year by soma £400 million in comparison with following a LIFO method. During tha first half yaar 1978. tha corresponding effects on net incoma were negative by about £60 million. Eliminating the FIFO effect and currency translation gains, the Increasa in net income for the half year 1979 over 1978 is about 23%.

the market canitalisation stenda at about £1.7m. 5hareholders ahould monitor carefully impact of the current weekly

The results for the second quarter 1979 hava been very substantially affected by the first-in first out (FIFO) method of inventory valuation used by most Shell companies and by currency translation gains. Tha underlying trend in Shell companies' earnings has improved; in addition to benefiting from the genarsl improvament in oil trading margins, other contribulory factors were the increased sales of higher-value oil products, increased North Sea crude oil production end higher chemicals aarnings.

The net income of the Royal Dutch/Shell Group of Companies for the second quarter 1979 and the first half year 1979, compared with the corresponding periods in 1978, is as follows: Second Ouarter

Interim Dividend

The directors have declared an interim dividend of \$.25p per 25p unit of stock which with the addition of stockholders' tax credit is equivalent to a "gross" divideod of 11.784p. This compares with the interim dividend of 7.272p (10.853p "gross") declared at the similar stage last year.

The dividend will be payable on 2nd January 1980 to stockbolders registered at the close of husidess on 23rd November 1979.

Estimated Half Year Results

As bas been pointed out previously, half year figures should not be taken as giving a indication of the outcome for the year.

	30 June 1979 £nr	30 June 1978 fm	Year 1978 £01
General Insurance Premiums Written (see Noie 1)	647.2	651.3	1220.1

Exchange Rates

In the above figures foreign currency has been converted according to our normal practice of approximately the average rates of exchange ruling during the period. The principal rates

			6 months to 30 June 1979	6 months to 30 June 1978	Year 197S
USA		•	\$2.05	1.88	1.92
Canada			\$2.40	2.10	2.19
Australia	• •		\$1.83	1,65	1.68
Netherlands			Fis4.17	4.18	4.15

Note (1) Premiums written in 1979 have been depressed in comparison with the period for 1978 maioly due to movements io exchange rates and to a lesser extent to accounting ebanges. If allowance is made for these factors, the underlying growth in premium income was 7.3% as against an apparent decrease.

Note (2) The effect of changes in exchange rates on the comparison of the half year results was to depress the profit before taxation for the first half of 1979 by £2.6m; the Investment income for the first balf of 1979 was adversely affected by £4.2m whereas the underwriting result benefited by £1.6m.

IN BRIEF

HAROLD INDRAM (design, manufac-ture and marketing of knitted germenus) --Rasulus for yast to April 30, 1379, reported July 2b with chairman's obser-vations on prospects. Group fixed assets £1.42m (£1.43m): Increase in net liquid_tunde £0.62m.(£0.22m). A new wholly-owned subsidiary is bang formad in the name of London Percels. It -is intended this this company will trade as a haulage contractor in London and the Home Counties. The operation should commance in September 1970. It is noosed infilt in time, this divisitifi-cation will bed a nave dimension to the group. 'So ler some £65,000 has been authorised for investment in any verticles. Mesung, 21, Newmen Siresi, W., on September 11, 31, 30.

Wi., on September Vi., at 11.00. HOLLAS GROUP (toxtrigs)-Results Lice year to-Match 31, 1973, and pros-pects, reported July 12. Group fixed assets C2.84m (ED.283m), net currant assets C1.59m (ED.74m). Cash and bank belances E327,522 (E756.092). Macting, Altringham, September 12, at 11 sm.

MINING SUPPLIES_Results reported July 28, 1979. Firsd cesets 15.35m ((4.59m). Net current assets 12.67m ((1.9m). Increase in working cepital E1.09m (10.63m). "Meeting Doncester on September 10 at noon.

Operating ratio

101.9

6 months

An underwriting profit of £5.5m was earned in the second quarter and so the underwriting loss of £19.5m for the first quarter, largely attributable to the abnormally high level of weather losses and large fire claims, was reduced to £11.1m for the half year.

In the United States in the second quarter there was a breakeven result. Property business improved largely due to the commercial multi-peril line which was restored to profitability. For the balf year as a whole automobile insurance produced the greatest part of the loss. Workers' compensation and general liability results were better than in the first half of 1978.

In the United Kiogdom, despile a further loss on householder, business, there was an underwriting profil of £5.1m in the second quarter which substantially offset the first quarter luss.

In Canada the underwriting loss at the half year was only slightly higher than at the end of the first quarter despite the severe impact of a windstorm in Southern Ontario.

In Australia there was a further underwriting loss in the second quarter and market conditions remained very difficult.

In the Netherlands ibere was a welcome return to profitability which was partially offsel by a small loss in the rest of Europe. . .

In "Other Overseas" which includes direct and reinsurance business there, was a satisfactory profit.

Associated Companies ...

The increase in the share of Associated Companies' profit is largely due to the ioclusion of the Aachen and Munich for the first time as an associated company following the increase in our shareholding to 20%.

the Certificates will carry an Interest Rate of 11 % per annum. Agent Bank FIRST CHICAGO LIMITED

Che war that never ends We British are a peaceful people. When a war is over we like to consign it to the history books - and forget it. But for some the wars live on. The disabled from both World Wars and from lesser campaigns, now all teo easily forgotion; the widows, the orphans and the children - for them their war lives on, every day and all day. In many cases, of course, there is help from a opension. But there is a limit to what any Government Department can do. This is where A rmy Benevolence steps in. With understanding. With a sense of urgency . . . and with practical, financial help.

To us it is a privilege to help these brave men-and women, too. Please will you help us to do more? We must not let our soldiers down.

20**MINING NEWS**

A buoyant first half for Bougainville

BY KENNETH MARSTON, MINING EDITOR

copper-gold producer in Papua New Guinea. Bougainville Copper. exceed most expectations K37.7m (E22.1m) against 23.4m in the same period of last year. The interim is doubled at 10 toea (5.9p); the 1978 final was 10 toea.

Six months coded June 30 1979 1978 IKC001 (K000) 155,947 57,360 60,363 55,905 Total revenue . Coat al sales, etc. Coneciate., amortisa-23 200 19,980 84,163 75,885 tion and royalties. Leaving Eliminus aplate er-change gruns & tax a direct reflection of the recovery in copper prices during the

period and the further rise in the zold price; the mine ranks among the world's major gold producers. In the latest period copper overaged 87.2 cents per pound compared with 57.9 cents a year ogn while gold was \$248.45 per ounce against \$178.48. Metal production, however, was lower in line with the expected reduc-

tion in ore grades. Eouçainville will pay tax at the standard PNG rate of 36.5 per tent on income up to about 195m for 1979, hut will be taxed at 70 per cent on orofits above this level. Because it is expected that the higher rate will apply this year the first half earnings include a proportionate charge for additional profits tax.

Exchange gains on foreign servency loan repayments have falien in line with the low level of repayments which totalled K16m against K61m a year ago. However, the company's loans ourstanding at June 30 had heen reduced to K46m.

FIRST HALF 1979 carnings of While the world's economies will the Rio Tinto-Zinc group's hig not suffer to the same extent as in 1974-75, Bougainvilla reckons is inevitable that the that il OPEC oil price rises will cause economic growth to falter and that this will be reflected in copper prices. Even so, the current rally has lifted copper

prices to the average levels of Bougainville's first half wille gold is considerably higher at \$298, There is thus the prospect of Bougainville maintaining ils high level of earnings for the

current half year and, indeed, confidence has been shown in the doubling of the interim dividend. On this basis the shares of this relatively low-cost pro-ducer do not seem overpriced at 130p

ROUND-UP

Iron Ore Company of Canada has made a first half 1979 profit of U.S.835.5m (£15.9m) compared with a loss of \$38.5m a year ago. The turn-round reflects a sharp increase in iron ore sales which were negligible in the same period of last year owing to a strike.

Shell Canada has been offering cnat from its Line Creek deposit in south-eastern British Columbia to potential customers in Csnada, Japan, the Far East, Latin America, the U.S. and Europe. Its coat arm, Crows Nest

Resources, has conducted "an intensive programme on future opportunifies" for hoth thermal and matallurgical coal in domestic and overscas markets. * *

The Association of

America's Freeport Minerals increase has declared a regular quarterly dividend of 30 cents (132p) a advantage of new husiness share, payable September 4 to opportunities as they may arise.

stockholders of record August 15 The dividend is unchaoged from the previous payment which was increased in June after allowing for the adjustment for the threefor-two stock split that became effective July 2.

W. GERMAN OFFER **TO DEVELOP**

COLOMBIAN COAL The West German Economic Affairs Minister, Mr. Otto Lambs dorff, has offered Colnmbia tech nical and financial aid in order to exploit huge coal deposits estimated at between 10hn and 40hn tonnes

Mr. Lambsdorff ended a three day official visit to Colomhia and flew to Caracas on the next leg of his Latin American tour. Previously he had visited Mexico.

He said that the Columbian Government had accepted his offer and would send a technical mission to West Germany soon to observe German coal mining techniques

drill an exploratory well in a block adjacent to the Brae field, and two or possibly three appraisal wells in Central and North Brae.

The company has submitted its development plan for a 112.000 barrel per day facility for South Brae to the Government. Production from the facility, which will cost \$1.30n. is expected to begin early in GBs production and coal sales 1983.

Marketing costs trim profits at Clorox

By Our Financial Staff

A SUBSTANTIAL increase in marketing expenditures for new products is blamed for a decline in fourth quarter profits of Clorox, the Oaklandbased household products and food gronp.

Net earnings were \$8.24m or 36 cents a share against \$9.86m or 43 cents a share previously, lowering the annual profit from \$30.67m (\$1.35 a sbare) to \$29.32m (\$1.30 a share). Fourth quarter sales were \$152.7m, against \$138.7m pre-

viously, making \$565.4m for the year, compared with \$465.8m for 1878. Commenting on the in-creased marketing expendi-

tures, the directors of the group said they would represent a key source of future growth for the company. They added that earnings

from Kingsford Charcoal were down significantly in the fourth quarter due to the independent truckers' strike.

Reeves ahead

Earnings at Reeves Brothers, the textile group, rose last year from \$12m or \$4.72 a share to \$19.6m or \$7.71 on sales of \$336.9m against \$39.1m, reports AP-DJ from New York. The dividend is increased from 45 cents to 50 cents a share.

finance

period_ Chrysler has yet to offer its But the new models are

projections, and is currently deeply preoccupied with the need to get rid of a vast backlog of \$0,000 1979 cars and trucks before thinking seriously about next year. Over the past two: days, the company has unveiled. its emergency sales plans at 22 regional meetings with dealers, and, as expected, it intends to trail a cash carrot in front of r potential customers.

This would mean that a purchaser of a Chryster vehicle would negotiate the best deal nbtainable from a dealer, but would then be able to claim a cash rebate from the manufacturer.

Chrysler is expected to con--firm today whether this will be as much as \$400.

This scheme was last tried in 1975, and boosted Chrysler's sales by 36 per cent over a fourmonth period. Within a month of its introduction, both GM and Ford started their own versions, which pushed up their sales by Lincoln- in sales from an anticipated about 18 per cent.

Ryder sees currency deficit NEW YORK - Ryder System cent from 11.1 per cent a year pass on the total cost of diesel expects a foreign, currency, earlier, and operating profits

fuel to new customers. They noted that the truck rental vision is using 20 percent more fuel than a year ago and the price rose to 76 cents a gallon in July from 56 cents in January.

The company is buying 78 per cent of its diesel, fuel from major nil companies at "reason-able prices" and the rest on the encing lower sales levels, but: rising demand for Volkswagen spot market, they said.

YORK -- Harris Sales for the quarter should economic outlook, we expect sales and earnings to be greater than this year's," Mr. Boyd Harris is "geared up" for earnings growth somewhere between 10 per cent and 18 per cent in 1980. We're moving aliead cautiously but we're

moving at full speed." In fiscal 1979 Mr. Boyd said that the semiconductor group performed at a rate "somewhat

bigher than the world semi-conductor market," showing an

CREDIT LYONNAIS

1978 FINANCIAL YEAR

: choracterised by a slow down in aconomic growth, limited invastmants ond o substantial hordaning of competition, : Lyonnais ochieved satisfactory results, olthough profits were lowar than those of the precading financial year.

successful.

ACTIVITIES IN FRANCE

. HE SERVICE OF ...

The main part of the axpenditure on properties was roted to improving customers' reception areas and security stems in many branches. In the field of quality and speed service, a number of branchas were fitted with up-to-data mputer equipment under the modarnisation programma. in addition, following the strengthening of regionel manage--ent ouring the preceding financial year, various reorganisa-Find ouring the preceding manchai year, various reorganisa-tions took place in Paris to enable a greater numbar of pranches to provide businass customers with qualified experts and services of a high tachnical standard, thus increasing tha processing capacity and the quality of the services provided.

... PRIVATE INDIVIDUALS ...

Facilitias granted to private individuals increased sub-transally in 1978: plus 14.8% compared to lass than 5% in

in regard to house purchase, besides its efforts to benefit barders of accounts linked with house purchase savings

Earing 1978, further additions were made to Crédit Ustanait already worldwida natwork. Foreign branches Acros with new offices in Brussels, Barcelona. Milan, San Franzisc, Hongkong, Sapul, now number more than fifty and cover all the major industrial coontries in Europe, as wall at the United States and Japan. In other parts of the world, especially Africo and South Amarica, whate links were forged a tone three ago, the Bank was particularly activa by means of its orbitalines and associated banks.

> and the Bank's own money markat Balanca Sheat increase of 26.2% for ed in terms of daily average, the volume

ed in terms of daily average, the volume ped at a slower rate: 7.5%. "sing intoma amountad to Frs. 7.448 million. B9%" Howaver, overheads rose at a higher ad the provisions for doubtful dabts, although the provisions for doubtful dabts, although st the provisions for doubtful dabts, although ist year, were again high: Frs. 618 million. The sits year, were again high: Frs. 618 million. The sits year, were again stop be borne in mind that illion in 1977, but it has to be borne in mind that where of the exceptional emounts levied against financial structures, the 1978 accounts supported a charge of Frs.

schemas (the voluma of main and supplamentary loans rose by nearly 45%), tha Bank did averything in its power to anable its customers to dariva tha maximum benefit from tha naw State maasuras to facilitate house purchasa.

Furthermora, in order that its customars could benefit batter from the legal provisions directed at channelling private savings towards invastment in industry. Crédit Lyonnais issued a new Trust Unit called "Sicay 5000 " which proved extremely

... AND COMPANIES

As far as companies ara concerned, tha Bank's continued policy of promoting axports was activaly pursuad, particularly with regard to madium or small concarns, ba it in tha field of information, sarvices (whosa range has been further diversified) or conventional financing. Present economic conditions have created problems both for expendion and conversion companies but expendion

for axpanding and contracting companias, but, ganerally spaaking, the Sank endeavoured to assist aither by oroviding finance or by erranging suitable acquisitions or mergers.

WORLDWIDE ACTIVITIES

As in previous years, the Sank's subsidiaries spacialising in hire-purchase, real estate and invastmant management, plus the joint services of the Europartnars Group anablad its customers, both private individuals and companias, to benefit from an extended range of services anywhere in the world.

Expressed in terms of average capital, customers' resourcas abroad raached a total 27.5% higher than in 1977, whilst tha volume of customars' utilisations increased by 15.9%.

BALANCE SHEET: + 26%

78 million.

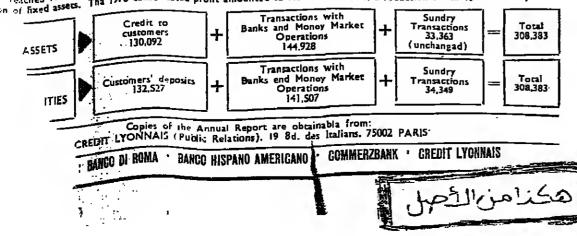

On May 31st. 1979, tha Shareholdars' Meeting adopted the eccounts end decided to allocate tha whole of the profit to reserves.

The 1978 accounts also raflect the rasult of the revaluation of fixed assats, in accordance with the Financa Acts of 1977 and 1978. On the whole, taking into account the revaluation, and

the fact that profit was transferred to reserves, the Bank's own resources on 31st December, 1978, amounted to Frs. 4,181 million insteed of Frs. 1,652 million. The working capital rose from Frs. 1,021 million in 1977 to Frs. 1,033 million in 1978.

CONSOLIDATED BALANCE SHEET TOTAL VALUE 308 BILLION FRANCS

31:: Decembar, 1978, the consolidated balance sheet of Crédit Lyonoais and companies of the Group totalled A 31st Decembar, 1978, the consolidated balance sheet of Crédit Lyonoais and companies of the Group totalled 3 33 393 million. Customars' deposits with the group amounted to Frs. 132,527 million, whilst credit facilities granted reached Frs. 130,092 million. The Group's own resources of Frs. 4,544 million reflected the effect of reached Frs. 130,092 million. The group's own resources of Frs. 350.3 million, a reduction of 22.8% from last yaar. tion of fixed assets.

Grundig naturally had to other people's products, he brought into this pro In the UK, the Genera In the UK, the General Electric Company has agreed a joint venture with Hitachi, whilst Rank has thrown in its lot with Toshiba. These operations. added to the UK plants of Sony and Malsushita, give the Japanese a strong foothold in Europe. With annual research and

development expenditures in consumer electronics lotalling around \$300m a year, these Japanese companies are a force to he reckoned with. It is no wonder therefore that

European comoanies even as successful as firundig, are feel-ing the need to huddle together r protection.

DSM first half loss lower than expected

By Our Financial Staff

RISING SALES combined with a generally less arduous trading background have allowed the first ball of this year.

Losses for the six months to June are Fls 35.6m 1\$17.5m1 compared to a profit of Fis 30.9m. In May of this year DSM predicled losses for the whole of 1979 of between Fis t00m and Fis 200m with the eventual outcome "likely to emerge" closer to the tup end of the range.

Sales for the six months are 16! per cent higher at Fls 6.2bit. Price rises account for six points of the gain but the halance of the increase stems from higher volume.

DSM's operating profit was little changed at Fls 53.0m compared with Fls 56.4m. Raw over of DM 12.56bn (\$6.85bn). material prices rose sub-stantially, but the margin between sales prices and raw material costs widened, particu larly in the second quarter.

Depreciation and amortisation rose to Fls 286.4m from Fls 197.1m while interest paid rose to Fls 67.3m from Fls 21.3m, mainly due to completion of the new plants. At the same time tax increased to Fls 29.7m from Fls 104m as result of higher caroings from

ome group units and a lower offset for loss making units. Capital expenditure fell to Fls 282m from Fls 432m, the company said. Looking ahead, DSM added that it was hard to 30 predict how long the present as R13.6m (U.S.S16.2m) comdevelopment of supply and pared with Rt3.1m in the demand in some fields of corresponding period of 1975 demand in some fields of corresponding period of 1975 etemleat activities will persist, and RISAm for the whole of

BASF earnings rise sharply

فكزاهن الأجهل

BY ROGER BOYES IN BONN

BASE, ONE of the three prin- reaching DM 470m on a turncipal West German chemical groups, has recorded a sharp over of DM 5.83br. These apparently drainatic increases rise in turnover and profils for the first half of 1979, indicating DSM, the Dutch state-owned that the industry has at last chemicals group, to report a come out of recession. There lower than expected net loss for its a fear though that oil price rises could eventually lead to a stifling of demand in many chemical sectors. Group saids were up by 18.2

per cent compared to the first half of 1978, thanks mainly to improved demand in Germany and the rest of Europe. Athnugh no detailed figures were given for the individual subsidiaries, EASF executives made clear that the strength of the Deutsche Mark was still inhihiting sales in the U.S., and that Brazil's high initation was eating into margins in the Brazilian subsidiary, Pre-tax profits for the groun increased by 58 per cent to DM 847m (\$462m) on a turn-

partly reflect the weakness of the 1978 first half, but BASF executives are none the less confident that 1979 will be a good year and the figures seem to justify the hones of the BASF chief executive Herr Mathias Seefelder, that sales growth would top ten per cont in 1979. However there is one major brake on turnover growth: the effect of higher oil and raw material prices which will have their primary impact in the second half. The figures for the BASF parent show that, in general, it has been possible since April to pass on the effects of the oil price rise to the company's customers, al least in some product ranges But BASF worns that the oil crisis will create a number of imponderables in the rest of this year. Specifically, the fear is that demand for plastics will Pre-tax profits for the parent, fall as the effects of the oil BASF AG, grew by 42.4 per crisis percolate through the cent over the 1978 first half, system.

China grain Irish may treble fishing fleet

There are problems the

BY STEWART DALBY IN DUBLIN

A HUGE expansion in invest- skate are small compared with ment in the Irisb fishing other European countries.

industry could see landings triple by 1984 to 300,000 tons, country faces in expanding the Seconding to Mr. Brendan O'Kelly, the chairman of An Bord Iascalgh Mhara (Irish Fishing Board). The value of fish exports could increase from catch. First there is very little traditional demorsal fishing. The Industry is almost totally an in-share and, and it will need bigger and better boats plus a greater desire nn the part of some of the country's 4,000 a current £32m to over £100m. Speaking in Dublin, Mr. O'Kelly said that ovar the next four years investment in Irisb fishing vesels could amount to £150m. Most of this will come from the private sector. although the BIM is empowered

to give 25 per cent grants and can belp in arranging finance. Some of the investment will be in boats of up to 120 feet. Irish boats usuelly go up to about 85 ft. Already, five 120 foot vessels, costing £10m, are on order.

. This year landings will be of the order of 105,000 tons. This will be made up mainly of pelagic fish like berring and mackerel (some 50 per cent of the catch) end shell fish. Catches of demersal (bottom feeding industry, Others, he say fish) like cod, hake, ling and developed over-capecity. New cocoa surplus predicted By Our Commodities Edito

COCOA PRODUCTION is likely

to exceed demand for the third year in succession in the 1979/ 1980 season, beginning in October, according to a special report by London brokers, Inter Commodities, issued vesterday. The report predicts that world

tonnes, compared with 1.452,000 tonnes, compared with 1.452,000 tonnes in 1978/1979, with main crpps in West Africa and Brazil developing well.

Consumption is also forecast to increase from 1.392.000 to 1.420 000 tonnes. leaving a surplus output of 60.000 ionnes fisbermen to find oew grounds. There is little history of large cod catches, for example, because it is a cold water fish. the same as in 1978/79.

With stocks refurning to normal levels the report suggests sont corna origes should fall to a £1.100 to £1.200 g tonne level during the 1979/ Secondly, the country will bave to secure adequate ouotas. Alrhough in the absence of an EEC common fisheries only. cuotas have not been set for this 950 SP850D. year. last year's allowable catches have been rolled over.

On the London encos futures on the London choose littures market, prices drifted lewer vesterday in the sbsence of buying interest. The December mosilion closed £17.5 down st Ireland bas a proportionate share of species like herring and mackerel hut because it has slarted from such a low base the £1.424.5 a tonne. Irish allowable catch of soecies

Producers are aonarently still holding out for higher prices. like cod and hake is very small Mr. O'Kelly claims though, but traders feel they will he that Ireland is one of the few forced to sell eventually. How-FFC countries which still has ver, it is thought demand may room to evnand its fishing industry. Others, he says, have be stimulated by the lower prices to a higher figure than that predicted by Inter Com-Department of Agriculture. and

modities. The Ghana Cocoa Marketing rields down to quite narrow Roard soid in Accea that it pur-chased 1.353 tonnes of mid-cron market price movements are cocos in the fourth week of the season. This brings total miderno purchases so far this season to RAGO tonops compared with 7 607 tonoes at the same time last year.

Harvest a qualified success

BY JOHN CHERRINGTON, AGRICULTURE CORRESPONDENT

I FINISHED harvesting winter barley last Friday with qualified satisfaction. The yield was some-thing nver two tonnes an acre, rather less than last year, hut the next crop and not botherthis covered a very wide variation which ran from 33 to welt ing at all about the last.

over 50 cwt. The worst yield came from the crop which had looked the best right through That being said, I think the prospects of the other main cereals, spring barley and wheat the appalling winter and spring. This was undouhtedly due to its dying off during the July are being clouded by the present run of bad weather, in the South at any rate. My own wheat recovered marvellously from the winter and by the end Instead of being nice and

plump, the grain was thin, mean of June was looking as well as and exceedingly dry. The moisit ever bas done. ture content on harvesting was Since then things have

about 13 per cent and it needed no drying at all. The only way changed, and my own crops in common with many others arp to account for this field's poor showing distinct signs of stress. showing is that the land is much Instead of mainring into a plpasant goldpn cplour there are nasly streaks of dark grpcn lighter than the stronger clays The reason for my dissatisbrown and even black on the faction is that all through the heads.

winter, harley looked better Close examination of the ears sped-both good wheat entries. than it had during the 1978 season, and I was looking for a discloses a selection of dispases The peas returned about the same as a crop of barley, and and infections which were not record yield. It just shows that apparent two or three weeks the grass seed rather less than the results of a harvest can be half, due to the weather.

accurately measured only after It is too late to do anything about them now, and it is even now looking rather sad, and I This makes me very sceptical would have probably been better off sticking to barley. doubtful if any previous treatment would have prevented it. The crops afflicted seem to other predictions of harvest belong equally to those who which I have practised for many have been spending thousands years on fields where there were on sprays and those who have no alternatives has been comlimits on which so many grain market price movements are kept their money in their plicated by the advent of the based. I never believe our own pockets.

Ministry of Agriculture esti-The worst attacks can shrivel mates, nor those of anyone else, the grain into chicken corn, and while my rubbed-out grains still But unlike most gupss-work, show a reasonable chance of and some spectacular results finishing at a decent size, one have been achieved.

posal figures, if they are ever there will be nothing in the certain weed problems are published at all, are available ears at all. This has been rearing their ugly heads, quite only in the subsequent harvest year when all minds are engaged with the prospects of a result of over-cropping or not sown in September and Octoher having a decent rotation. nothing much can he done

The present wheat crops are

barley monoculture

But

tract

It is exactly the case with about certain grass weeds until this field. I had grown Ia crops the crop has been harvested. of barley in succession. Con- Then the time hotween harvest of barley in succession. Con-tinuous barley is about the oce form of monoculture which will and sowing is very short indeed. With spring barley it is work, but siren voices had been assuring me that after a run of barley like this wheat can he possible to spend quite a bit of

So heing greedy as wheat is more valuable than harlpy. I tried it, and can now say autheritatively that 15 years of barley will not break the grin of "takeall."

This is only a small field and right alongside I have a much sidered giving it up as much as I have done if I could have found a barley which yields as larger acreage of land on which the wheat was preceded by a crop of peas and one of grass well as the average autumn sown variety and ripens in mid-July

This is something for the plan1 breeders to gp1 their teeth into. They have done a great deal to confuse the scene of recent years by the introduction of apothora of new varie-ties which have made little lasting impression.

The moral of all this is that in farming, as well as in most other things, it is very foolish to count one's chickens before they are hatched.

Continental winter or autumn It is also becoming very clear sown harleys. These certainly yield better that the spring to me that there is no shortcut to consistently good yields through chemicals, minicultivavarieties we had been used to tion or any nostrum compared with almost traditional rota-

But these are early days and tional systems.

House of Fraser put on 3 to 145p an

reccol sharp rise in bank lendiog had slowed helped to stabilise the market later in the afternoon without imparting any freah huyiog incentive. Corporation stocks benefited from the events in Glltedged and established rises to 4. Early speculation about the weight of money poised for in-vestment in British Funds lent

support to the equity sections. Wall Street's further advance wall streets former advance overnight also gave the move-ment some impetus in the first hour or so of business and more interest was displayed in leading transformer and the stock interest was displayed in leading shares then for some time. By noon, the FT 30-share index was o otany huying orders were 6.9 up, hut enthusiasm subse-tithdrawn. There was still sufficient dustrials drifted s shade easier

Trade in investment currency was evenly balaoced and made little impact on rates which hardened following the late

half-yearly figures on September 5, closed 8 to the good at 246p. Comment on the interim results and, in particular, the under-writing prospects for the remainder of the current year belped General Accident touch 234p before closing 4 up on

halance at 230p. Elsewhere, still reflecting the increased interim dividend, Britannic zdvanced 8 more to 168p. A modest demand for the major clearing hanks was sufficient to leave improvements ranging to 10. Barclays ended

hat much better at 445p, while NatWest added 9 to 345p and Midland, 378p, and Lloyds, 300p, rose 6 and 5 respectively. A little more buying interest than of late developed in the Brewery sector, particularly in selected secondary issues where Marston rose 8 to 109p and Welverhampton and Dudley,

295p. and Border, 80p. firmed around 5 spiece. Srottish and Newcastle closed 8 ahade dearer at 691p following the chairman's encouraging statement on the outlook

feature Insurances with 2 rise of 13 to 355p, after 363p. Other Composites made progress in sympathy and GRE, which report terim results. Elsewhere, A. and terim results. Elsewhere, A. and J. Gelfer were notable for an advance of 4 to 53p in response to the good first-half profits. Bakers Household Stores came in for support at 103p, up 13, hut further profit-taking in the absence of hid developments alloped 3 more from Beters at clipped 3 more from Peters at

Stylo Shoes revived with a

nents gained 8 to 438p and Eurotherm 9 to 323p, while Kode firmed 8 to 230p. Racal rose to 475p before settling at 470p, also for a rise of 8. Muirhead gained 4 to 242p and Electronic Rentals a similar amount to 200p but, still reflecting the warning oo margins, Dale moved against the trend and closed 3 down at 131p for s two-dsy fall of 17. In the leaders, GEC finished only a penny firmer at 394p. after 400p. Lesdiog Engineers tended 10 ease after an initial upward flurry. John Brown closed 2 dearer at 435p. after 438p. while Hawker Siddeley finished a similar amount higher at 186p following the previous day's setin Buildings was back. Press comment on the interim figures had little impact oo Tubes, a few pence chapter at 332p. Elsewhere, Charles Clifford responded to the good interim results and dividend payment with a rise of 10 to

128p, while satisfactory prelimi-nary figures left Woodhouse and Rixon 11 firmer at 24p. Fresh support lifted B. Elliott 5 to 227p the Deferred added 4 to 118p. while Taylor Woodrow improved and Greens Economiser 3 more 6 more to 386p. Redland, 189p, and Marchwiel, 114p, rose 4 spiece. Contract news stimulated to 123p. Buyers also showed interest in Wolseley-Hughes, which advanced 6 to 273p. and in Newman Tonks, 3 dearer at interest in Fairclough which firmed 24 to 771p. Renewed sup-port was fortbcoming for Gough Proceedings in Foods were

Cooper which put on 4 to 90p, while huying ahead of the interim results due next Thursdominated hy the active trade in Spillers which put on 11 to 51p on speculation aroused by Daigety's proposed sbare offer day prompted a gain of 3 to 87p in William Whittingham. worth about 50p; Dalgety shares ICI touched 34Sp before settling at 345n for a gain of 4 on hardened a penny to 301p. Else-where, huyers came in for Northern Foods which firmed 4 balance; the interim results are due next Thursday.

to 124p, while Robertson added 5 to 155p as hid hopes revived.

Leading Stores encountered good demand especially in the first hour or so of business. A fresh flurry of speculative buying on revived enfranchisement and bld hopes helped Burton "A" better, while Beecham, 147p, Roots, 193n god Bowater, 170p. on provide entrancement and logion, of the Beecham, 147p, reaction of S to 256p in Lasmo, bid hopes helped Burton "A" better, while Beecham, 147p, reaction of S to 256p in Lasmo, stand out with a rise of 10 to Boots, 193p and Bowater, 170p. The balf-yearly statement bad 274p, while Gassies "A" closed all ended 4 dearer. Second little impact on Ultramar, 4 to the good at 424p. House of thoughts about the second unaltered at 314p, after 318p. Fraser put on 3 to 145p and quarter results helped Unileyer, Siebens (UK) edged np 4 to

Other following comment on the in- to 70p following the second demand and closed with wide to 70p following the second-quarter profits recovery and National Carbonising firmed a like amount to 81p on Press sug-gestions that the group might sell its 8.8 per cent stake in London and Spatish Marine Oil Await. and Srottish Marine Oil Awaiting news of the projected sale by the NEB of its 24.42 per cent stake in the rompany, ICL gained 15 to 475p. Sothehys revived with a rise of 10 to 345p. Re-newed speculative interest lifted Booker McConnell 7 to 347p and

Stylo Snoes revived with a fresh speculative improvement of 6 to 216p, while Strong and Fisher did well at 78p, up 4. Trading in the Electrical sector was reasonably brisk. Among the high-filers, Electrocompo-

Marshalls Universal 6 to 130p. Thermal Syndicate were wanted at 126p, np 8, and Wilson Walton rallied 3 to 15p. Rock Darham were notable for a rise of 5 st 45p. while similar improvements were rerorded by Briden, 117p, Diploma Investments, 342p, and Smiths Industries, 198p. By way of rontrast, B. Fertleman declined 2 to 17p in reaction to the dividend omission and trading loss.

Motor Components moved higher with **Lness adding 5** to 257p and **Dunlop 2** to 63p. In Garages, Manor National firmed 2 to 23¹/₂p in response to the interim results and the hoard'a ronfident statement.

Activity in Properties was mainly confined to the morning session. The early demand subsequently gave way to profit-taking which left Land Securities unchanged on balance at 311p, after 315p, MEPC 2 chesper on the dzy at 201p, after 205p. Capl-tal and Counties, bowever, held s gain of 4 2t 1040, as did Haslemere, st 310p. Elsewhere, asset value ronsiderations lifted Rusb and Tompkins 3 more to 160p, after 163p, and left M. P. Kent 4 to the good at 80p. Buyers again showed interest in Fairview Estates which put on 7 to a 1979 peak of 234p, while Evans of Leeds added 6 to 123p and Lyntoo firmed 5 to 190p. News that McKay Securities had sold a 71 per cent interest in its Reading warebouse complex for approximately film lifted the price of 5 to 150p, but Dares

Estates slipped a penny to 251p following the interim results and proposed rights issue.

Serond quarter figures in line with most market expectations left Sbell two pence easier at 332p. after 326p. Elsewbere In the Oil sector, British Petroleum fluctuated oarrowly before settling without alteration at before 1200p, but the withdrawal of

Trusts encountered a useful demand and closed with wide-spread gains while, in Financials, Park Place were noteworthy for rise of 5 to 73p.

SEET, a firm market of lete, met selling after the preliminary results and gave up 5 to 72p, but Corab responded to the halfvearly statement with a rise of 11 to 401p. Elsewhere in the Textile actor, renewed support left Lister up 4 more at 65p and Rivington Reed 2 further at 25p. while demand from Ireland prompted 2 rally of 5 to 230 in Yonghal.

Rhbers plotted an irregular course in moderate trading. Jitra put on 4 to 147p while Anglo-indonesian firmed 5 to 115p as did London Sumatra, to 270p. Guthrie, however, cheapened 5 to 540p. Despite the profits set-hack, McLeod Russel closed unaltered at 260p in Teas.

Activity in Sonth African Golds remained at a low level. Prices were marked down at the outset, reflecting the initial weak-, ness of the bullion price, but they subsequently recovered to close showing little change on balance as American buying followed the rally in the metal price.

The latter was finally S2 easier at S298.125 an ounce. The Gold Mines index registered a 0.8 gain ICI at 167.1 and the ex-premium index put on 0.1 at 147.1. South African Financials were generally quiet with the notable exception of General Mining which added 10 more to 555p in response to further Johanne buying. Gold Fields of South Africa were unaltered at the same price in front of the annual results expected today. Selection Trust were a feature

in London Financials as persis-tent buying in a restricted market pushed the shares. 16 higher at 530p. Rio Tinto-Zinc eased towards the close and ended a nenny harder at 298p, after 300p.

In an otherwise easier Coppers section, Roan Consolidated Mines rontinned to attract American support which left the shares 10 up at 95p, making s two-day gain of 15. Minorco, however, dipped 5 to 160p and Palabora were.

marked down 20 to 450p. Australians held steady despite a downturn in overnight domestic markets. Bongainville rose 5 to 130p following the doubled interim dividend and increased profits, while Peko-Wallsend were well supported in the late tride and advanced 13 to 345p. Elsewhere, the Irish-Canadian Northgate Exploration gained. 5 to 350p, after 365p, following the Improved second quarter results. Barton Warrants, No pots were Totals - Totals -

Spillers to raise prices early

30

By Christopher Parkes

SPILLERS, the second-higgest miller in Britain, is likely to announce an increase in the price of flour within a few days, rather than in September or October. as was previously expected

Spillers may have been prompted to bring forward the move by the surprise takeover bid from Dalgety, the agri-cultural and food merchanting group, announced and promptly rejected on Wednesday. Spillers' shares rose 11p yesterday to 51p. just above the offer value.

A recovery io milliog margins could form a major plank in its against a takeover. defence Flour milling accounts for considerably more than half Spillers' profits.

Increases in the price of wheat this year, even without antonomy of the West Bank, are allowing for higher energy and now virtually nil, according to lahour costs, are enough to U.S. officials. justify a rise of at least 10 per cent, equivalent to 1p on a standard large loaf.

Market experts, however, expect something more modest, between 5 and 7 per cent, with perhaps more to follow early in the new year.

The three largest millers in Britain. Spillers, Ranks Hovis McDoughl and Associated British Foods are all keen to raise returns from flour, but they also have to keep an eve on the competition and avoid pitching prices too high.

There are some 40 independent flour producers in the country with much more flexihility and lower overheads than

market leaders could allow them | action by over 160,000 industrial room to ernand their sales con- civil servants. whose dispute derably. "The others could make onite part of Britain's defence system.

raised 17 months and. Ilader normal circumstances millers would be expected to hold back increasing the price until they hed a chance to asess the home wheat harvest, which has yet in

Wheat prices usually fall sharoly at the start of a new grain morkating ceason and these reductions would normally be taken into account in flaur

price colemiations.

Young exit could hit **U.S.-Arab** relations

BY DAVID BUCHAN IN WASHINGTON

ANDERW

MR.

YOUNG'S But even Israel, whose protests lessly allowing a changed U.S. re as U.S. over the meetings triggered policy towards the PLO to be over the meetings triggered dramatic departure as U.S. ambassador to the United Mr. Young'a downfall, seems not Nationa, following a major diplomatic row over his meeting to bave been placated by Mr. Young's departure. It sees hia behaviour as part of a wider with a Palestine Liberation Organisation official, could prove to he a serious aethack to U.S.-Arab relations and to the pattern of secret State Depart-ment dealings with the PLO. The White House also faced

hitter criticism from the American hlack community over Carter Administration's standing with black American voters. Mr. Zehedi Terzi, the PLO representative in New York with whom Mr. Young held his clandestine meeting, described President Carter's acceptance of Mr. Young'a resignation as giving in to "Zionist-Israeli blackmail." This echoed strong President hecauae of his cuts in social and welfare programmes, predicted Mr. Carter might not criticism around the Arah world win enough hleck votes to and in Africa yesterday over secure his re-election.

second.

Alhaji Shagari, who will take office on October 1 after 13 years of military rule. But the National Party of Nigeria candidate clinched his victory through a con-troversial decision by the Federal Electoral Commis-

sion on how the electoral law should be interpreted. The decision has angered the other four contenders for

the Presidency who expected a run-off, through an electoral college, between the twn leading contenders for the post. The other candidates had already said they do not

accept the interpretation nn which the decision is based. Alhaif Shehu's election to the Presidency is likely to be which welcomed by fureign business. A former Finance Minister, his party advocates an onen

market policy for Nigeria to encourace miside investment. The President, who is 55, has said the greatest dis-incentive in investment has been the lack of guaranteed continuity in Government policles.

Controversy over his election arose over the constitutinn's requirement that, in addition to winning the most votes, a candidate had to win at least a quarter of the votes in two-thirds of the 19 states tn win on the first round.

Protested

Two-thirds of 19 was taken to mean 13 states. The NPN won a guarter of the votes in 12 states and 20 per cent of the vote in a 13th state, Kano. But four days ago it said that the constitution did not specify what two - thirds actually meant and gave its own interpretation.

The nther parties protested at this and the outcome was expected to be decided in the law courts, Bat the Feedral Election

Making sense of Shell's profits

I HE LEX COLUMN

fluttering of its Fifo/Lifo petticoats, Shell has unveiled Index rose 5.5 to 479.7 enormous and utterly mislead

nnderlying second - quarter figure, at £375m or so, was supplied at £304 and £304, but ended the day at £304. Count-ing in Wednesday's spilles. actually some £50m below first-cuarter levels: so much for the bumper profits. Some of this decline is tions it is generally reckoned that around two thirds of the tap has gone and the rest could accounted for by lower gas tap has gone and the rest could follow fairly quickly. Although, the Government's funding programme is well ahead of schedule there is no room for complacency. In July sterling M3 grew by 0.8 per cent. This looks reasonable enough sales and other seasonal items, hut it must partly reflect the slight easing of oil markets: from the very height of the shortages. Since the third, quarter began these markets have eased still further, and unless OPEC proves fiself lending, and gilt sales of film. universedentedly nimble at Over the past three months, cutting back sumlies as when the authorities have all the process will be hastened by demand falls. If Shell expected. £2.6hn of gilts to the non-bank the markets to fighten; if would private sector, sterling MS has hardly have allowed its storts; still been growing at an to fall to minimum operational annualised rate of 14 per cent The third quarter will bring more stock profits and per eath-ings fur the year. locinding the

annualised rate of 14 per cent-comfortably ahead of the official target of 741 per cent-. For the gitt-edged market, the key question how is whither the sharp slow down in thank lending in July is just a hiceup of something more permanent. To get a proper picture it is necessary to add in the growth of hank acceptances held on tside the hanking sector. These came to f450m over the past couple of months-roughly-equal for a tay recovery, may he around F3 Shu before currency F7 Shn before currency changes. But the underlying profit could be no more than \$7.5bn, and in 1980 it may well he loog than this. At 332p the Shell T & T shares are standing at around seven times expected 1050 earnines With profits set for a doll patch, the shares are unlikely So far this year the growth profits up by 58 per cent. The in bank lending has averaged company does not expect for \$730m per month (leaving aside maintain this pare is the the growth in acceptance, second balk, Still Westdenische business). If the official money Landesbank predicts cambigs supply targets are going to be per share of DM 20.06 up from met, monthly bank lending DM 12 and back at less to the l'including acceptances), should, 1976 level. The bank expects be growing at no more than a dividerd of at least DM 7.00, about \$200m per month. This so the shares at DM 137, yield is a measure of the credit, a prospective 5.7 per cent. to minerform the market, especially as the dividend-fired by Royal Inteh in guilders may offer only a token increase in mald to the Shall the

rest of the year R is not going to he able to repair the damage of the storm hit first quarter, when it lost f19.5m. The UK husiness is picking up smartly, and is heading for useful profits. But Royal is now he coming noticeally less break about its prospects in the U.S. where it now seems to be head ing for a loss of several million pounds this year compared with a profit of 210.5m less time. Canada and Amstralia have their problems too, and overall Royal could see last year's underwit-ing profit of 2214 and the a small loss in 1979: At the same time, currency At the same time, currency movements are holding back the rise in investment tacione. So at the prestar level, the year's profits could be down from f153m to liftle more than £130m

Yet the shares still rose 13p to 355p yesterday and some brokers are now arguing that brokers are now arguing that the composite instrumes sector's years in the stock market wilder-ness could be drawing to a close. In aggregate, the big companies are likely to report a motest overall profile decires this year, and 1980 will probably be flat too: But as General Accident showed on Wednesday. There are some big divident there are some big dividend increases coming frow two or three of the companies. Any dividend covers could still adequate for payments to the my say, a tenth in 1990 which is more than can be said with any confidence for most sectors. Meanwhile the shares yield sib-stantially more than the market avarage. Royal: which has less room for big dividend increases

than most, is probably on a prospective yield of about \$1 per cent. BASE The first balf results for BASE necessary to add in the growth of . BSC ore reaches Hunterston

By Ray Perman, Scottish Cnrrespondent

THE BRITISH Steel Corporation is using Rotterdam and Glasgow docks in an elaborate procedure to supply its paralysed Hunterston terminal on the Clyde, with iron ore—at an extra cost of £800,000 a time.

Hunterston, one of the world's most modero terminals, ahle to accept ships of up to 300.000 lonnes, has been cloaed by an nter-nnion diapute since . its 100m completion in April.

Ore that would have been un-toaded directly from large bulk carriers at Hunterston is being raktn instead to Rotterdam where it is transferred to small ships able to use Glasgon locks and unload at the obsolete

Seneral Terminus Quay. The extra handling charges of the transfer amount to £5.50 per tonne, adding up to £800 000 or each 150.000 tonne ore shinment. But it is still cheaper for the corporation to take adventage of large bulk carriers by using Rotterdam than to use mall vessels.

BSC has so far chartered two pulk carriers to Rotterdam since Junterston's _ completion, and s expected to charter further ressels if the dispute goes on. Yesterday, Atlantic Splendour,

a bulk carrier on charter to SSC, finished unloading 150.000 connes of ore from Septiha Bay. Brazil, on to the quayside at Rotterdam. Two ships are wait-

ing to ferty it in 15,000 tonne joads to Glasgow. Normally, the Hunteraton erminal will save £3,00 per onne in handling costs over Seneral Terminus Quay—giving an annual saving of £9m to mai 12m.

Dockers, members of the ransport and General Workers' Jnion, have blacked the erminal because they want the 30 new pobs at Hunterston to de designated as dockers' work But the steel corporation wants hem filled by redundant steelvorkers who are members of the Iron and Steel Trades' Confederation.

Talks have been going on unuccessfully for five months to ry to settle the matter. A compromise formula was eached two weeks ago by Mr. sill Sirs, general secretary of STC, and Mr. Alex Kitson, xecutive officer of the TGWU, out was last week rejected by lockers' shopstewards.

MR. RAJ NARAIN, chairman Defence Minister when the

of India's Janata (Secular) Jaguar deal was signed. Party which is the major Mr. Narain said ye partner in the ruling coalition that be bad "circums Government, yesterday alleged that Rs1.5hn (£83.7m) has been given as "pay offs" for choos-ing Britain'a Jaguar aircraft for the Indian air force.

BY K. K. SHARMA IN NEW DELHI

had accepted a week ago

This followa aeveral weeks of pressure from Mr. Narain for a review of the Jaguar deal, which was signed in November last year and could be worth more than £1bn. Last week he warned that "full facts" were

in his possession which implied that "undue pressure" was hrought to bear in winning the contract.

It is widely believed that Mr. Narain's allegations are closely linked with India'a current political crisis, and the vote of confidence which Mr. Charan Singh, the Prime Minister, facesi n the Lower House on Monday, Mr. Narain is a close

Mr. Narain said vesterday that be bad "circumstantial evidence" indicating that the Jaguar deal had been finished much earlier than November. when it was signed.

He alleged that the deal was clinched when Mr. V. Sbankar, secretary to Mr. Morarji Desal. the former Prime Minister. visited Londnn early in autumn, accompanied by Mr. Desai's son, Kantild.

Mr. Narain argues that India should have bought the "superior" French Mirage F.1. should The Pakistani Air Force flies Mirages, however, and is understood to be interested in the F-1. This alone makes Indian purchases of Mirages improbable.

Two Jaguara bave already been delivered, and the Indian Government bas paid a substanconfidant of Mr. Singh. Mr. tial advance nn the deal. Jagjivan Ram. who is now Penaly clouves make a full releader of the opposition, was view of the deal unlikely.

Michael Donne, Aerospace Correspondent, writes: While British Aerospace declines to comment officially on the suggestion of bribery in the Jaguar contract with India. It is under-stood to be confident that any review would abow that it has done nothing to merit criticism.

The Jaguar deal is expected to he worth well over £1bn to British Aerospace over the next few years, involving both the supply of completed aircraft from the UK and the eventual manufacture of aircraft under licence in India.

British Aerospace negotlated the deal over several years, during which time the Indian government held similar discusaiona with many other proaped tive suppliers, including France and the Soviet Union.

The value of goods exported from the UK in the first six months of 1979 including intragroup sales was £13.8 million.

Income and expenditure of overseas subsidiary and associated companies have been converted into sterling at the rates of exchange ruling at the end of each period. Reduction of the sterling values of the Holding Company's interest in overseas companies, arking from exchange fluctuations, has been excluded from the profit and loss account.

In the 1978 accounts, the Group adopted the new accounting standard on referred taxation (SSAP 15), and this eliminates the necessity for deferred taxation on UK profits as it is not expected that taxation deferred by timing differences will be payable in the foresceable future. The charge of £3.10m, in the first half of 1979 relates church to overdeas taxation.

While these results show some needed improvement over these of 1978, progress has been hampered by the effects of external strikes: the lorry drivers brick followed by a prolonged dockers' strike at lummingham (which cut off aupplies of one of the main raw materials), resulted in a small loss on the UK operation and the continued strike at the works of the supplier of sulphuric acid affected the Ganadian profits. The strength of starting multified much of the benefit of improving export prices and depressed the value of overcas carnings.

Demand continues to be firm. However, the full cliects of the oil price increases of early. 1979 have still to work through into costs both in UK and overseas, and future selling prices will necessarily have to reflect this increase if the essential improvement in margins is no be achieved.
